## FOREWORD – DIANE GRAY, DEPUTY DIRECTOR OF PUBLIC HEALTH

### How averages tell only part of the story

On the surface of it, Milton Keynes as a borough is performing well. Educational attainment has improved and is similar to the England average. Teenage pregnancy rates have fallen; and there has been little change in the proportion of homes in receipt of housing or council tax benefit despite the ongoing national financial difficulties.

However, dig even slightly beneath the surface and one finds wide disparities remain in income, educational attainment and community wellbeing. With ever more limited resources in the public sector, it becomes ever more a struggle to know how best to allocate them.

Sir Michael Marmot, in his 2010 review into health inequalities, reminded us that focusing solely on the most disadvantaged will not reduce health inequalities sufficiently. To reduce the steepness of the social gradient in health, actions must be universal, but with a scale and intensity that is proportionate to the level of disadvantage. This 'proportionate universalism' requires us not just to dwell on the communities faring worst in this social atlas, but to look at all settlements and consider what the proportional response is to each.

The Marmot team suggested six policy objectives necessary to reduce health inequalities, and made clear that delivery should start at home, by empowering individuals and their communities to get involved in improving their environment and wellbeing:

- Give every child the best start in life
- Enable all children young people and adults to maximise their capabilities and have control over their lives
- Create fair employment and good work for all
- Ensure healthy standard of living for all
- Create and develop healthy and sustainable places and communities
- Strengthen the role and impact of ill-health prevention

We are fortunate in Milton Keynes in that the production of this social atlas sets out for us a clear and incontrovertible starting point on the state of our borough's inequalities. We are also fortunate to have locally the passion, the partnerships and the commitment necessary to take the Marmot recommendations and turn them into effective actions. But the challenge is now to actually do just that: use the data, harness that passion and deliver better health and fewer inequalities for all. Onwards.

## EXECUTIVE SUMMARY

Milton Keynes as a whole is relatively affluent and most people enjoy a good quality of life but significant numbers of residents experience disadvantage in one or more categories.

### Income

On average 234 per 1,000 dwellings in Milton Keynes get housing or council tax benefit, a means tested benefit. This has barely changed since last year, when the figure was 237, although it had risen for the previous two years, probably in response to economic circumstances. The highest rate is 613 out of 1,000 in Beanhill, which has risen from last year.

### Children & Education

There are seven indicators in this category covering a diverse range of topics affecting children. Numbers of children getting free school meals is a traditional indicator of disadvantage that shows a large variation across estates. The average is 14% of pupils with the highest, 46%, in Beanhill.

As educational attainment has a strong association with future disadvantage, the following 3 indicators focus on this. Unfortunately we have lost access to local data on the proportion of young people not going into higher education, so this indicator uses data from last year, when the average across Milton Keynes was 89%. The remaining indicators look at educational attainment in schools. Firstly, the proportion attaining below level 4 in Key Stage 2 English. The Milton Keynes average is 20%, with great variation across estates. This is the same overall as the English average. Performance has improved since introduction of the tests. In 1997, nationally 37% of pupils were failing to reach level 4, and 41% of pupils in Milton Keynes. The second of these indicators assesses the proportion of pupils gaining less than 5 GCSEs at grade A\*-C including Mathematics and English. The Milton Keynes average is 50%, the highest is 100% in 4 estates. The English average is 53% of pupils.

### Community Factors

Community factors include those affecting how people feel about their home environment. There are several different factors in this category including domestic fires; recorded crime and neighbour complaints.

Domestic fires have been found to correlate strongly with disadvantage. Looking over a rolling 5-year period, on average there were 7.8 fires per 1,000 dwellings in Milton Keynes from 2005 to 2010. The highest was 47.6 per 1,000 dwellings in Redhouse Park, a new estate. Crime data has been included for violent crime, burglaries and criminal damage. The highest rates of both violent crime and criminal damage occur in Central Milton Keynes because of the high visitor population. Peartree Bridge saw the highest rate of neighbour complaints to Environmental Health with 100 complaints per 1,000 dwellings. The Milton Keynes average was 37 per 1,000 dwellings.

### Health & Disability

There are 6 health and disability indicators listed in the grid profiles, although only 4 of these are used in the calculation of the overall rankings. Teenage conceptions: on average there were 53 conceptions per 1,000 girls aged 15 to 19, a 14% fall from the previous average. Disabled concessionary fares and clients of disabled services are included as pointers towards areas where the population has a greater need for support. Some of the variations in these factors are explained by the dominant style of dwelling in the estate, for example more bungalows.

The final 3 indicators focus on hospital activity. The emergency admission rate was 96 per 1,000 population per year. Non-emergency hospital admissions were included for information; this indicator was not included in the overall rankings. Visits to accident and emergency were also included in the estate profiles.

# INTRODUCTION

The purpose of this series of documents is to enable people working towards social inclusion to identify:

- the most significant social inclusion issues
- geographic concentrations of need
- the relative severity of social exclusion compared with other areas and the national picture
- a snapshot position
- geographic areas and issues where development of services and initiatives might be focused
- to measure change

It also serves to prompt discussion on possible causes of inequality and suggestions for actions to achieve improvement.

The data used are primarily locally collected data, intended to highlight areas with a high need for public services. Earlier work included developing a framework to structure information gathering, along the lines of those used by the government in “Opportunity for All” and by bodies such as the Joseph Rowntree Trust. The framework has the following categories:

- Income
- Children
- Young adults
- Adults aged 25 to retirement
- Older people
- Community factors
- Health and disability

The indicators included this year are directly comparable with previous years; however data on the proportion of young people not going into higher education could not be updated, so this indicator uses data from last year.

The ideals restricting choices for indicators are that:

- They should be capable of being collected at ward and/or below ward level
- They should be commonly available across all local authorities
- They should ideally allow for national comparisons
- They should have an acknowledged relationship with disadvantage.

Useful developments since the first document have been:

1. The setting up of the Office for National Statistics website for the Neighbourhood Statistics Service. Extensive amounts of data, from the 2001 census and other administrative data sources, are available at local level at no cost. The site can be found at [www.neighbourhood.statistics.gov.uk](http://www.neighbourhood.statistics.gov.uk)
2. The development and updating of the Index of Multiple Deprivation, a multi-dimensional indicator available to lower-super output area level, published in 2000, 2004, 2007 and 2010.
3. The development of the MK Observatory, a web-based data resource to share, map and visualise data. The web site can be found at: [www.mkiobservatory.org.uk](http://www.mkiobservatory.org.uk)

## SUMMARY OF INDICATOR TRENDS

Table 2: Summary of Indicator Trends

### Indicator trend key:

- ✓ data shows improving trend since the 2001 Social Atlas (SA)/2010 data
- ✗ data shows worsening trend since the 2001 SA/2010 data
- data broadly constant (within 10%) since the 2001 SA/2010 data
- only baseline data available or insufficient data available to determine a trend

	Trend Since	
	2001	2010
<b>Income Indicators</b>		
Housing/Council Tax Benefit claimants	✗	■
Free School Meals Uptake	○	■
<b>Children Indicators</b>		
Family Referrals*	■	✓

Note: this definition assumes higher uptake of services is worse, in reality the converse could be true in that more eligible persons are being identified. All comparisons are between rates so are unaffected by population growth.

\* Policy changes since the 2001 Social Atlas may have encouraged an increase in the number of Family Referrals.

# INDEX OF MULTIPLE DEPRIVATION 2010

## What is it?

The Index of Multiple Deprivation 2010 (IMD 2010) is a national measure of deprivation. It is used to analyse patterns of deprivation, identify areas that would benefit from special initiatives or programmes and as a tool to determine eligibility for specific funding streams.

It combines a number of indicators, chosen to cover a range of economic, social and housing issues, into a single deprivation score for each small area in England. This allows each area to be ranked relative to one another according to their level of deprivation. Most of the indicators used in the IMD 2010 are from 2008 although some of the indicators come from the 2001 Census. As with the 2007 indices, IMD 2010 has been produced at Lower Super Output Area level (LSOA), of which there are 139 LSOAs in Milton Keynes.

Map 2: IMD 2010 Overall Deprivation Rank

## Milton Keynes District

Map 2 shows the IMD 2010 mapped for the districts in England. The figures for Milton Keynes show that:

- Milton Keynes returned a score of 15.59 which is ranked 211<sup>th</sup> out of 326. With 1 being the most deprived. This compares to the 2007 rank of 212.
- Authorities ranked closely to Milton Keynes include Cheltenham (214); Chichester (213); Solihull (212); Braintree (210); East Devon (209).

## Milton Keynes' Lower Super Output Area Analysis

As stated previously IMD 2010 was released at LSOA level. Map 3 overleaf shows the results for Milton Keynes Super Output Areas.

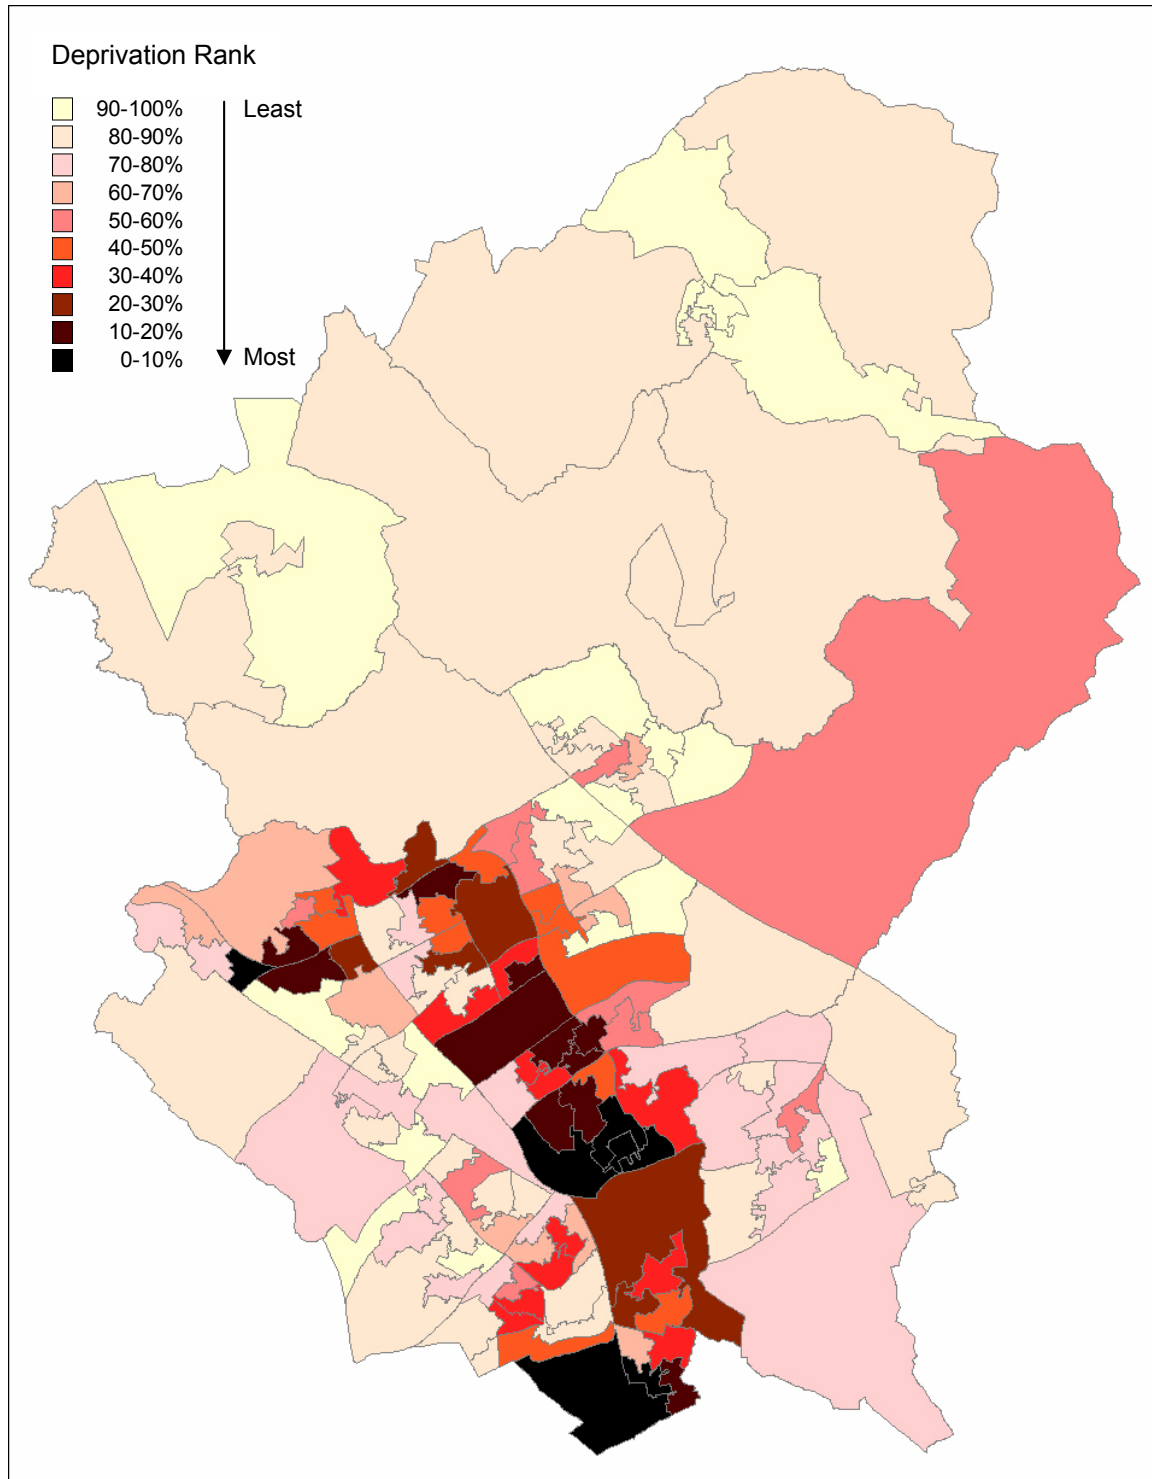

Table 3: LSOAs in MK within the 30% most & 30% least deprived.

Table three shows the number of LSOAs in Milton Keynes within the most/least deprived 10%-30% LSOAs in England with a comparison to 2004 and 2007. The table shows that of the 139 LSOAs in Milton Keynes there are 7 which are within the 10% most deprived in England. This compares to 6 in 2007. Overall there are 24 LSOAs within the most deprived 30%, two more than the 2007 Index. There are 17 LSOAs within the least

**Map 3: IMD 2010 deciles in Milton Keynes compared to England**

The map outlines that there are 7 LSOAs in MK which are within the most deprived 10% in England. These areas cover a large part of Woughton Ward and parts of Eaton Manor Ward and Fullers Slade. Overall there are 24 LSOAs within the most deprived 30%. There are 17 areas within the least deprived 10% these are in rural areas, Newport Pagnell and some areas in the city.

**Map 4: IMD 2010 – Income Deprivation Affecting Children. Deciles in Milton Keynes compared to England**

The map outlines that there are 12 LSOAs in MK ranked within the most deprived 10% in England for income deprivation affecting children. In addition there are 38 areas within the most deprived 30%. There are 7 areas within the least deprived 10% and a total of 31 in the least deprived 30%.

## UNEMPLOYMENT

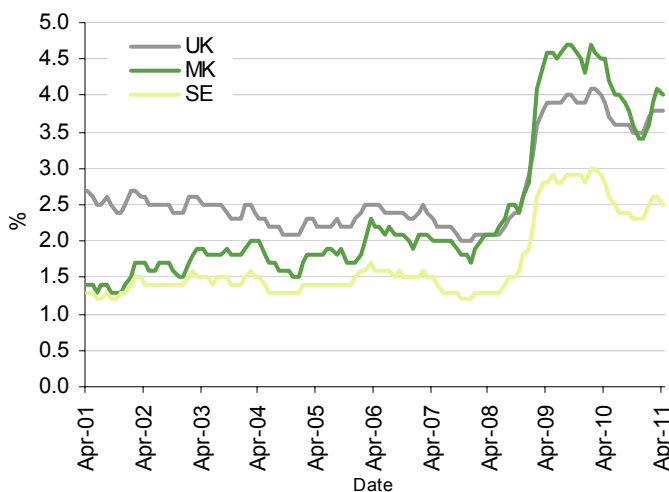

In April 2011 there were 6,492 people in Milton Keynes claiming Job Seekers Allowance. As a percentage of the working age population in Milton Keynes this is 4.0%. Table 4 shows that Milton Keynes had a higher unemployment rate than both the national average (3.8%) and the South East Region (2.5%).

1,105 claimants in Milton Keynes had been claiming for more than one year in April 2011, accounting for 17.1% of total claimants. This compares to 13.4% in the South East region and 14.3% in the UK.

**Table 4: % of the working age population claiming unemployment benefits April 2011**

**Figure 1: % of the working age population claiming unemployment benefits, April 2001 - 2011**

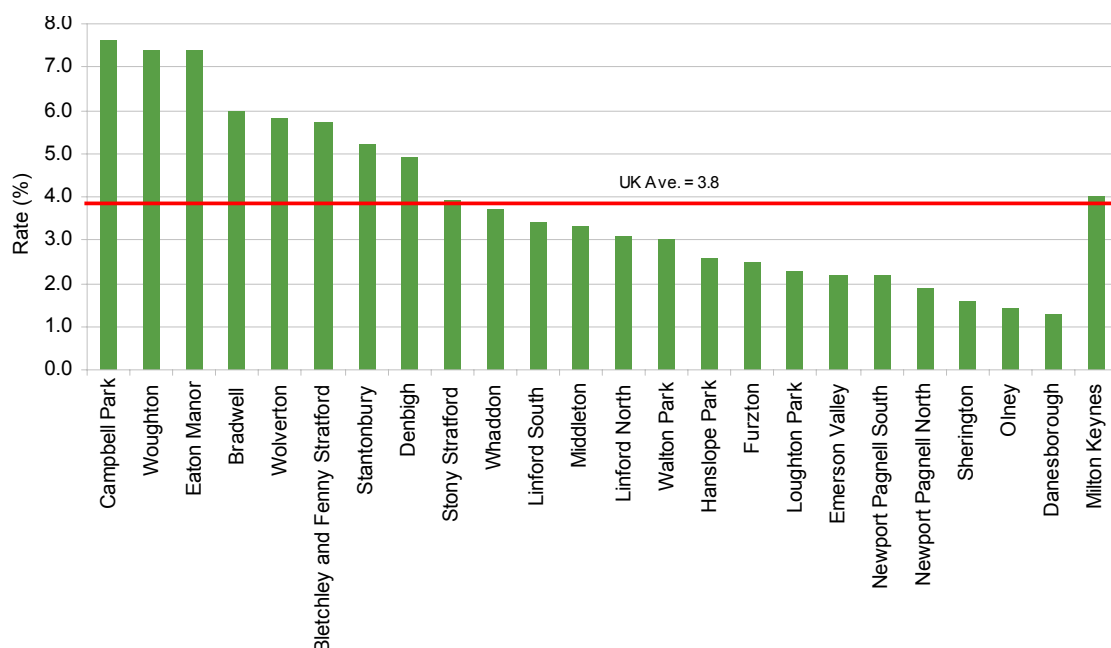

Between April 2009 and April 2011 the claimant rate decreased from 4.6% to 4.0%. The graph to the right shows the changing unemployment rate for Milton Keynes, the South East and the UK.

Figure 2 outlines that there were 9 wards in MK with higher unemployment rates than the UK. Campbell Park (7.6%), Eaton Manor (7.4%) and Woughton (7.4%) had the highest unemployment rates in MK. These wards were within the 10% highest ranked wards in the UK. Danesborough and Olney had the lowest unemployment rate in Milton Keynes and were within the 20% lowest unemployment for wards in the UK.

and Olney had the lowest unemployment rate in Milton Keynes and were within the 20% lowest unemployment for wards in the UK.

## OVERSEAS MIGRANT WORKERS IN MILTON KEYNES

All European Economic Area (EEA) and Swiss nationals are free to enter and live in the United Kingdom. From 1st May 2004, 8 Eastern European 'accession states' joined the EU (the A8). Workers from the A8 countries who find employment in the UK are required to register with the Home Office under the Worker Registration Scheme as soon as they find work. They are then issued with a worker registration certificate, issued for a 12-month period. This proves that they can live and work in the UK while they are working in that job. If they change jobs before the 12 months they have to renew their registration. Once 12 months has been completed under the Worker Registration Scheme they can apply for an EEA Residence permit.

Since the accession states joined the EU a total of 4,505 have registered under the scheme for a workplace address in Milton Keynes. This does not imply that there are over 4,500 residents from the accession states. The workers may not live in Milton Keynes. We have no information about how long the workers remained with the employer, or in the country. It is evident that the flow of workers reduced substantially to a low of 365 in the 2009/10 year.

However, this year the number has increased again to 735 – almost as many as were seen in 2007/08. The vast majority of WRS migrants between 2004-2011 were from Poland – 67% overall. However, in the most recent 24 month period, the numbers from Latvia and Lithuania and have risen sharply. The most common job that migrants came to do in Milton Keynes is 'warehouse operative'; the occupation stated by 69% of WRS applicants. 13% stated 'process operative', so factory work attracts over 80% of these migrants.

**Figure 3: Most stated occupations of WRS applicants in 2010/11**

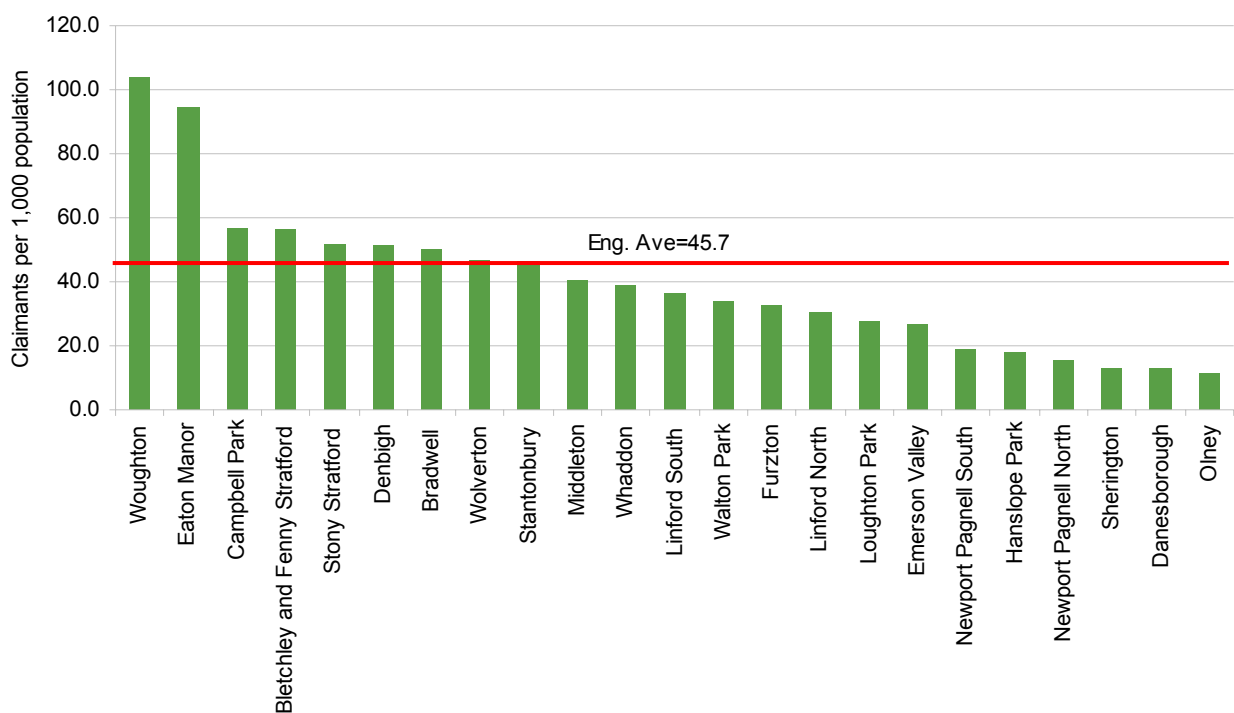

## INCOME

In August 2010 Milton Keynes had a smaller proportion of the population claiming Income Support than for England as a whole. Milton Keynes had a rate of 42.4 per 1,000 working age population compared to 45.7 per 1,000 in England.

There is significant variation in the rates of Income Support claimants between the wards in Milton Keynes. Woughton ward has more than double the national rate. Estates covered by this ward include Beanhill, Coffee Hall, Eaglestone, Leadenhall, Netherfield and Tinkers Bridge. Eaton Manor Ward is also significantly above national average rate of Income Support claimants.

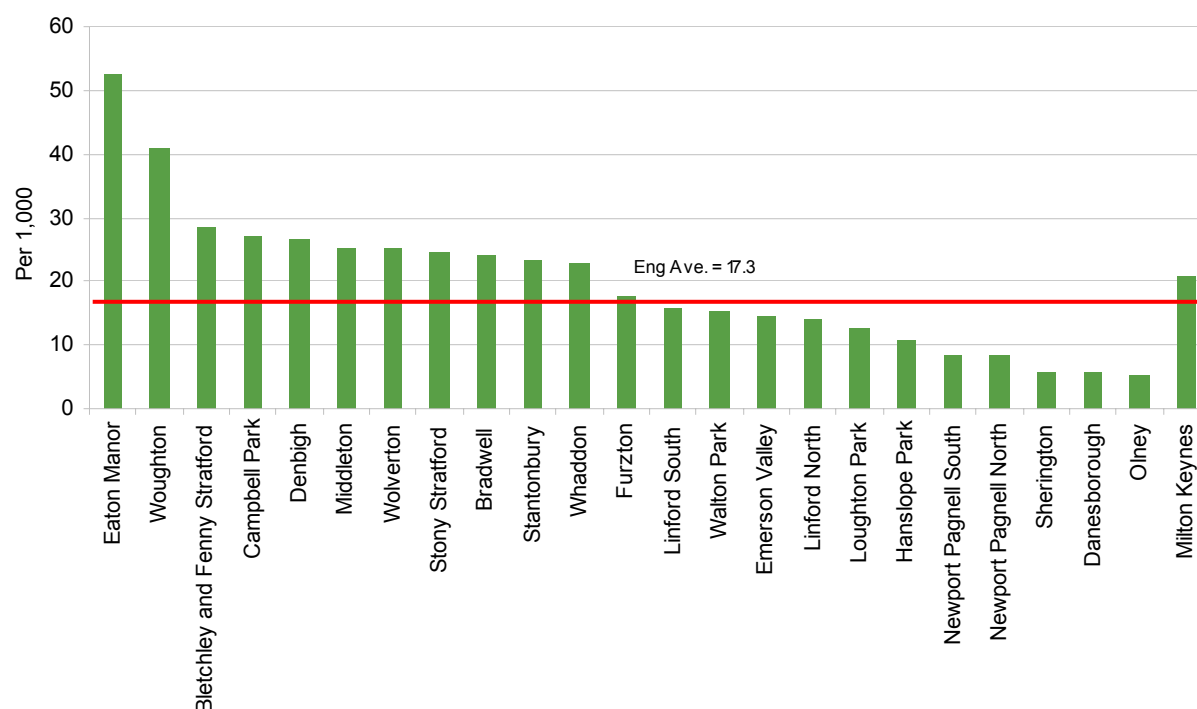

**Figure 4: Income Support Claimants per 1,000 population, August 2010**

## CHILDREN

In August 2010, 3,370 lone parent families claimed Income Support in Milton Keynes. This is a rate of 20.9 per 1,000 working age population and is higher than that of England as a whole (17.3 per 1,000). There are 12 wards in Milton Keynes where more than the England average of lone parents claim Income Support. Eaton Manor and Woughton Wards are more than twice the national average.

Figure 5: Lone Parent Income Support Claimants per 1,000 population, August 2010

## YOUNG ADULTS

Table 6 shows the number and percentage of 18-24 year olds claiming Job Seekers Allowance in April 2011 and 16-24 year olds claiming Income Support in August 2010. The cells marked in green mean they are higher than the England rate.

Campbell Park (11.3%) and Woughton (11.1%) have the highest % of 18-24 years claiming Job Seekers Allowance. This compares to 7.0% in England.

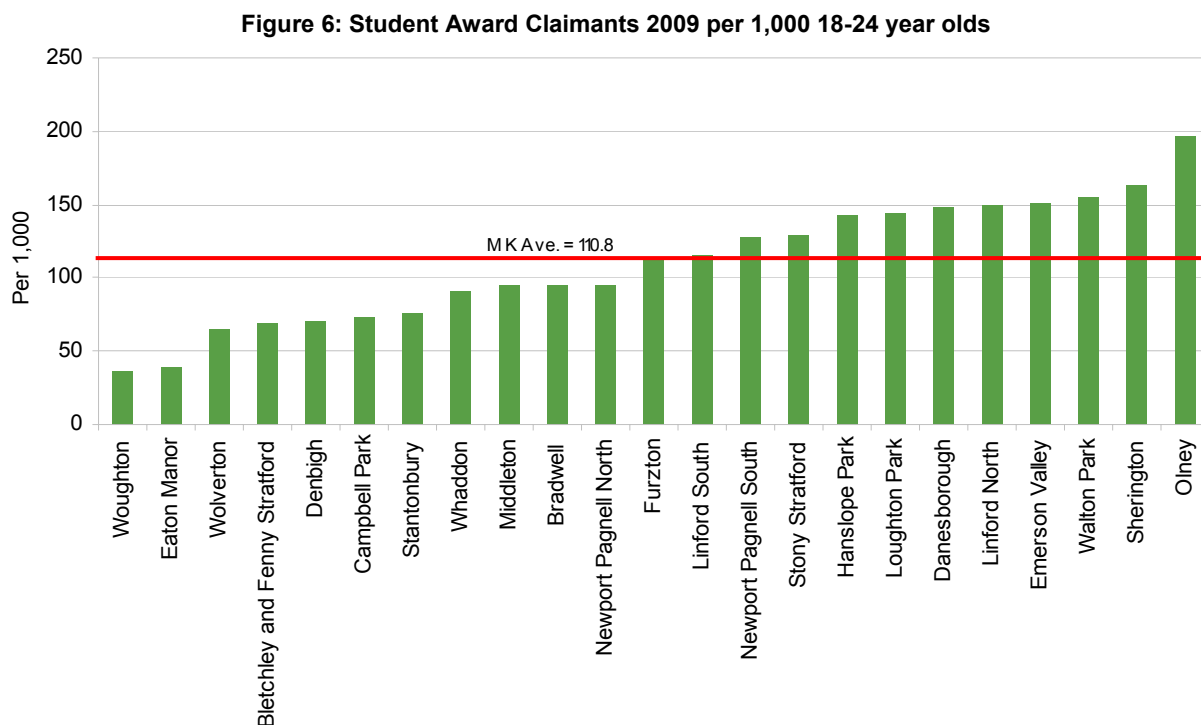

Bletchley & Fenny Stratford, and Eaton Manor and Woughton have double the England average (3.6%) of 16-24 year olds claiming Income Support.

Very low levels of young adults claim Job Seekers Allowance or Income Support in the rural areas of Milton Keynes.

Figure 6 shows the number of Student Award claimants per 1,000 18-24 years old for wards in Milton Keynes. A significant number of Milton Keynes wards fall beneath the MK average (110.8 per 1,000 18-24 year olds). Woughton and Eaton Manor Wards have particularly low proportions. Olney, Sherington and Walton Park wards have the highest proportions.

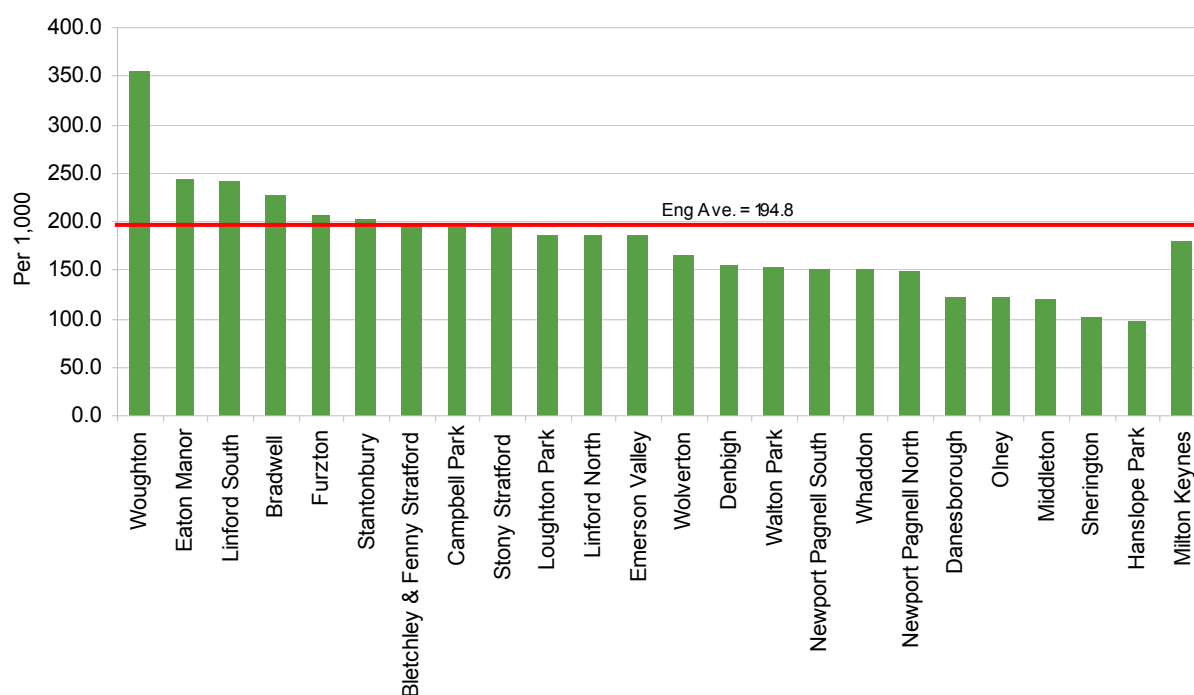

## OLDER PEOPLE

7,310 people aged 60 and over in Milton Keynes were claiming Pension Credit in August 2010. This is 179.9 per 1,000 population age 60 and over, lower than the England average of 194.8 per 1,000. 7 out of 23 wards in Milton Keynes are above the national average with Woughton (355.5 per 1,000) standing out as significantly higher than the other wards. Eaton Manor, Linford South, Bradwell, Furzton, Stantonbury and Bletchley and Fenny Stratford Wards also have a higher than average number claiming Pension Credit.

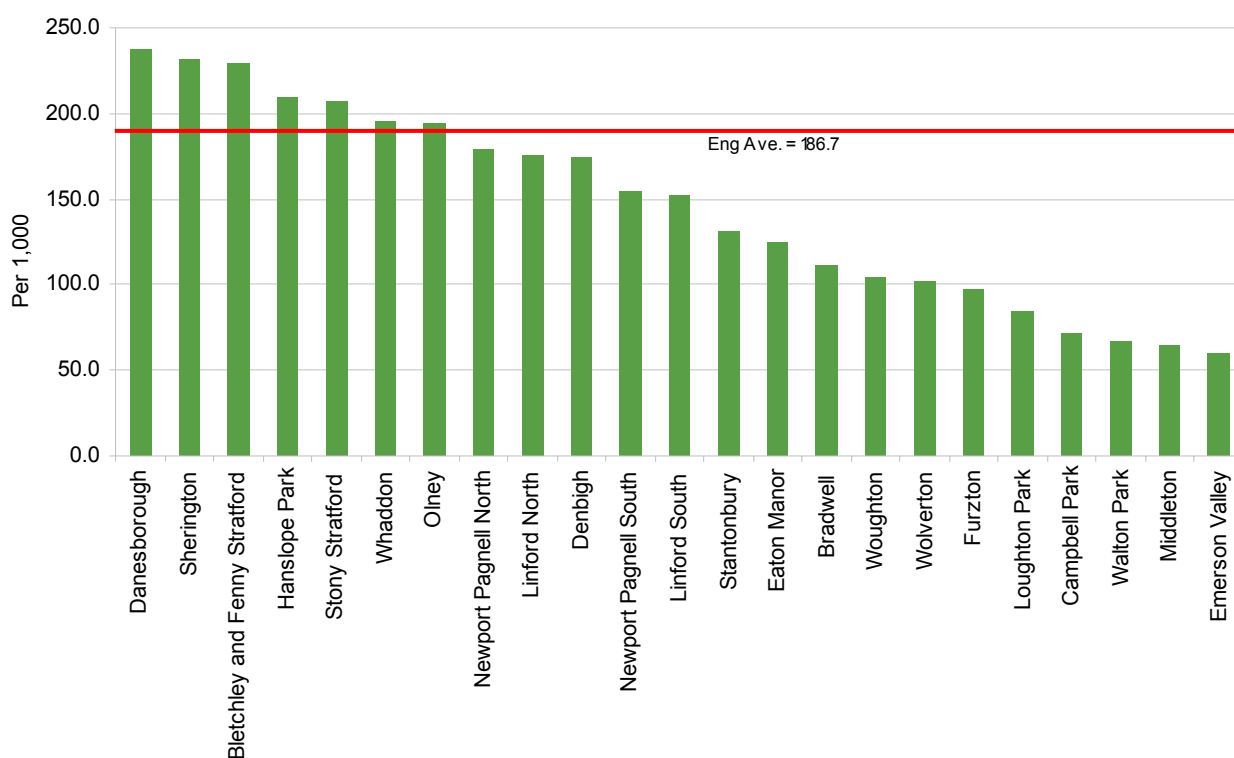

A total of 31,370 people in Milton Keynes claimed a State Pension in August 2010. This is 129.9 per 1,000 population, significantly lower than the England average of 186.7 per 1,000, reflecting the young profile of Milton Keynes population.

**Figure 7: Pension Credit Claimants per 1,000 population aged 60+, August 2010**

The graph below shows there are significant variations in the proportion of people claiming a State Pension between the wards in Milton Keynes. Danesborough, Sherington and Bletchley and Fenny Stratford Wards are significantly above the England average. The wards with the lowest State Pension claimants are Emerson Valley (59.6 per 1,000), Middleton (64.7) and Walton Park (66.1).

## NEIGHBOURHOOD COMPLAINTS AT WARD LEVEL

Neighbour complaints are an important tool for assessing the quality of life enjoyed in a neighbourhood. These are complaints by residents about their neighbours made to the Environmental Health service. Historically, the greatest numbers of complaints are about excessive and untimely noise. This year has seen complaints about various causes of noise including construction and street works. The rate of neighbour complaints per 1,000 dwellings has fallen compared to the previous year, for the first time after four years of rises. Some large differences are apparent when examined at ward level, where there is a variable pattern of increases since 2009/10 (Bradwell; Eaton Manor; Woughton; Stantonbury; Denbigh; Whaddon; Loughton Park; Newport Pagnell North; Hanslope; Olney and Sherington), with the other wards showing a fall. Danesborough ward has shown a fall in the rate of complaints for the second year running.

The rural areas show generally lower complaints about neighbours, after accounting for the number of dwellings, than the urban areas. Sherington ward has the lowest number of complaints per 1,000 dwellings this year, closely followed by nearby Olney. However both areas have seen a substantial increase from the previous year. The lower level of complaints could be a result of the lower housing density in these areas. Bletchley & Fenny Stratford and Campbell Park are the wards with the highest rate of complaints for the second year running, although both have seen a fall from the previous year. Campbell Park ward has shown a substantial decrease in the rate of complaints.

## HEALTH AND DISABILITY

People in the UK are healthier and living longer than ever before. The major advances in life expectancy over the last century are due mainly to declines in both infant mortality and mortality at older ages, public health innovations such as improvements in water quality and sewerage, and mass immunisation programmes which have reduced infectious diseases (DH, 2010). Life expectancy is linked to social circumstances, and the gap in life expectancies is large, and in some areas is widening. Life expectancy at birth does not reflect the life experience of any individual. Instead, it provides a summary of the mortality experience of the individuals living in a particular area, over a period of time. Gaps in life expectancy can be observed between local authority areas. For example, in 2007/2009 in the United Kingdom a difference of 13.3 years was observed between areas with the highest life expectancy at birth for boys, and areas with the lowest. The gap for girls in was 11.5 years. The gaps within these areas can be even wider. The current situation for Milton Keynes can be seen from the chart below.

**Figure 10: Persons Life Expectancy at Birth by Ward, 2005 to 2009 Average**

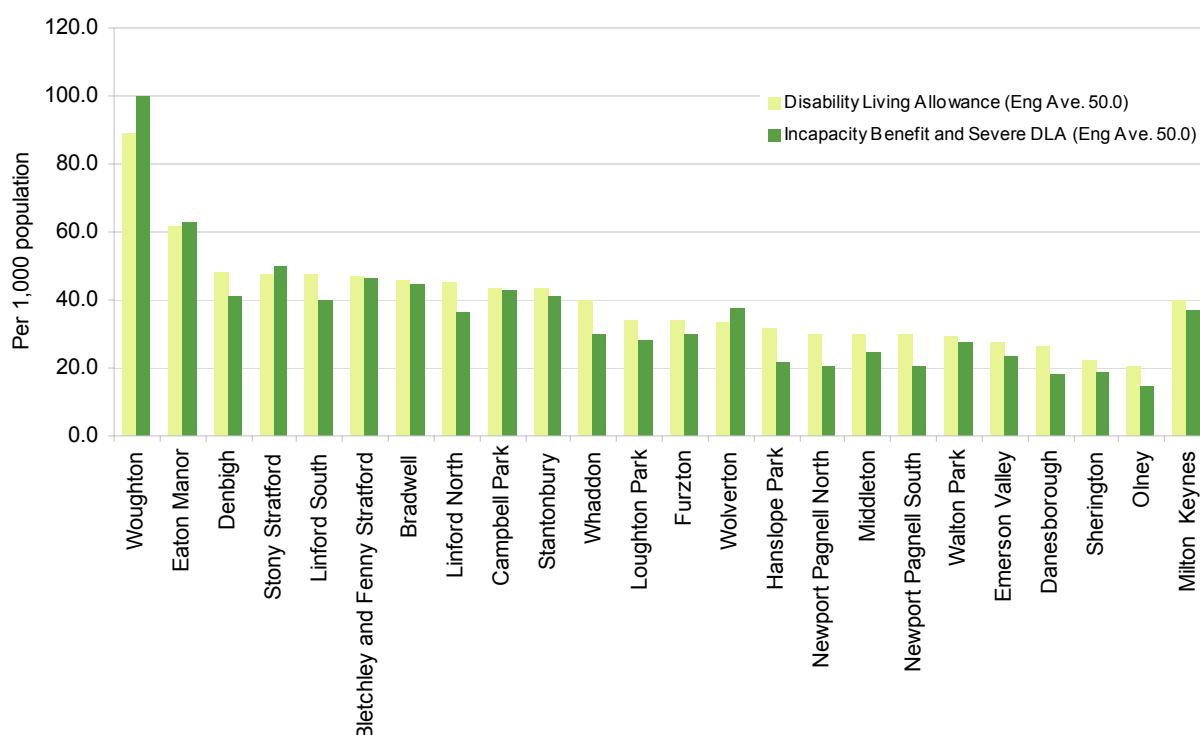

The average life expectancy in Milton Keynes for 2005-2009 was 79.9 years, slightly higher than the previous year although this may be due to statistical fluctuations. The range between wards was almost 9 years, a reduction from almost 12 years. The ward with the highest life expectancy in this period is Middleton with a life expectancy at birth of 83.7 years. Woughton has the lowest life expectancy of 74.7 years, but this has risen since the previous calculations.

The life expectancy at birth was 78.0 years for males, range 9.4 years. This is higher than previously and the range has decreased slightly. This is equivalent to the average male life expectancy for the UK, but slightly below that for England of 78.3 years. Middleton had the highest life expectancy for males of 82.3 years. Woughton has the lowest life expectancy for males of 72.9 years.

The life expectancy at birth for females in Milton Keynes has risen to 81.7 years, and the range has fallen to 10.2 years. This is below the female life expectancy in England & Wales, 2007/2009 which was 82 years although these are not directly comparable because of the different time periods covered. Furzton had the highest life expectancy of 86.8 years with Hanslope Park second with 86.5 years. Woughton again had the lowest at 76.6 years, no change from the previous figure. There is a reasonably high level of consistency over time between the rankings of life expectancy (the relative position of wards) for the calculations. There is some variation due to statistical uncertainty surrounding such small-area calculations which is to be expected.

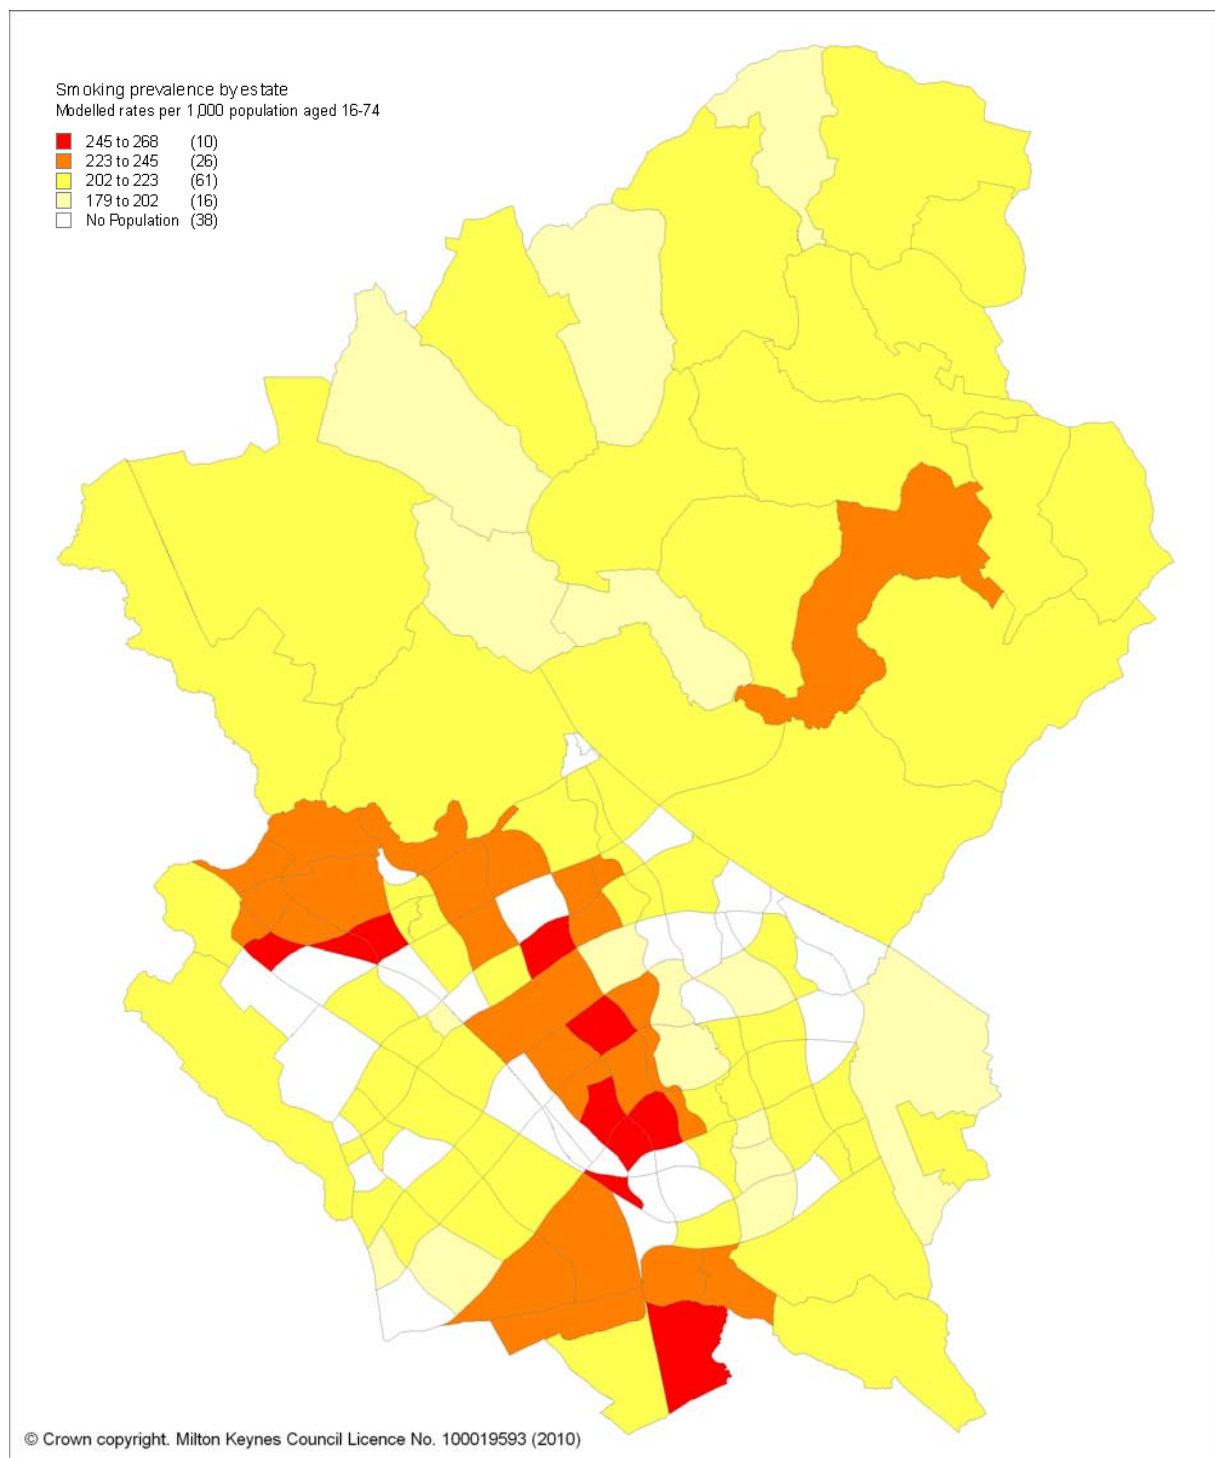

Nationally available disability benefits data provide us with results at ward level. Milton Keynes has a lower proportion of residents claiming Severe Disability Living Allowance, Incapacity Benefits and Disability Living Allowance than for England as a whole. Woughton ward is consistently higher than the national average for both disability benefits. It has twice the average Incapacity Benefit/Severe DLA rate. Eaton Manor Ward also has higher than the national average in both benefits.

**Figure 11: Disability Benefit Claimants per 1,000 population, August 2010**

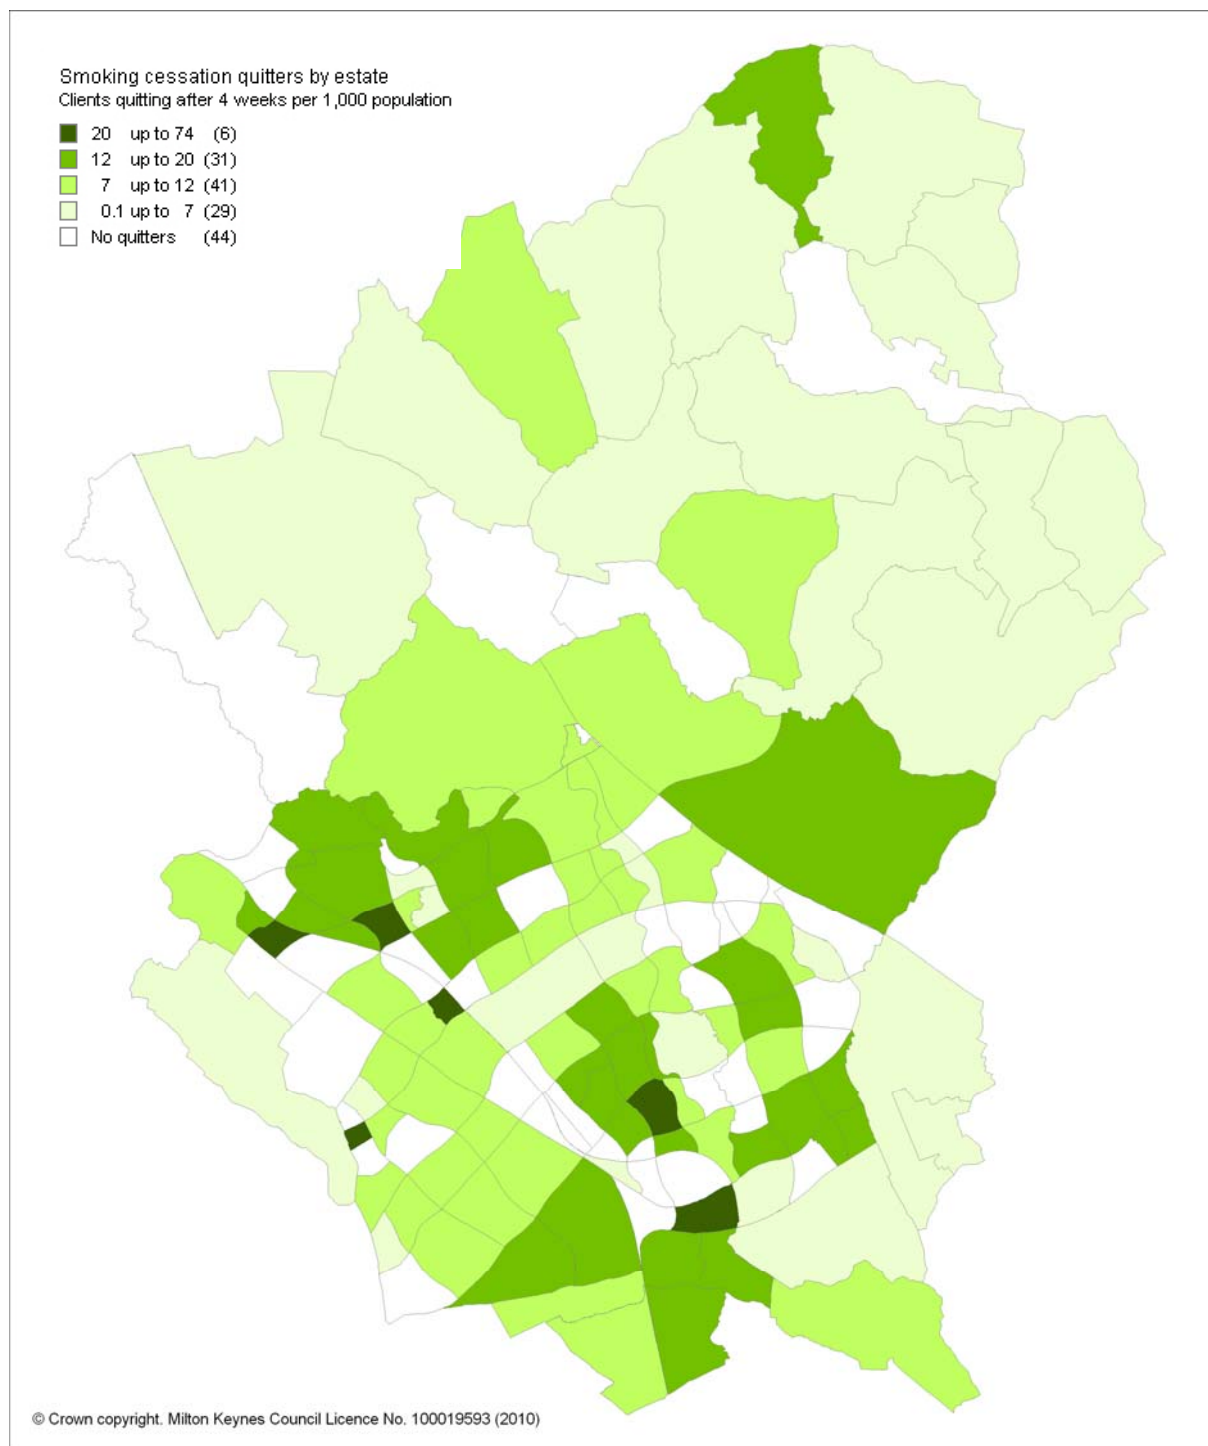

Indicators such as Disabled Concessionary Fares and Clients of Disabled Services at Milton Keynes Council are useful at looking at local health and disability. They have been useful in pointing out several areas of need, such as Beanhill, Coffee Hall, Fenny Stratford, Pennyland, and Willen Park. These can be seen in the estate indicators section.

**Map 5: Smoking Prevalence estimates by Estate per 1,000 population aged 16-74\***

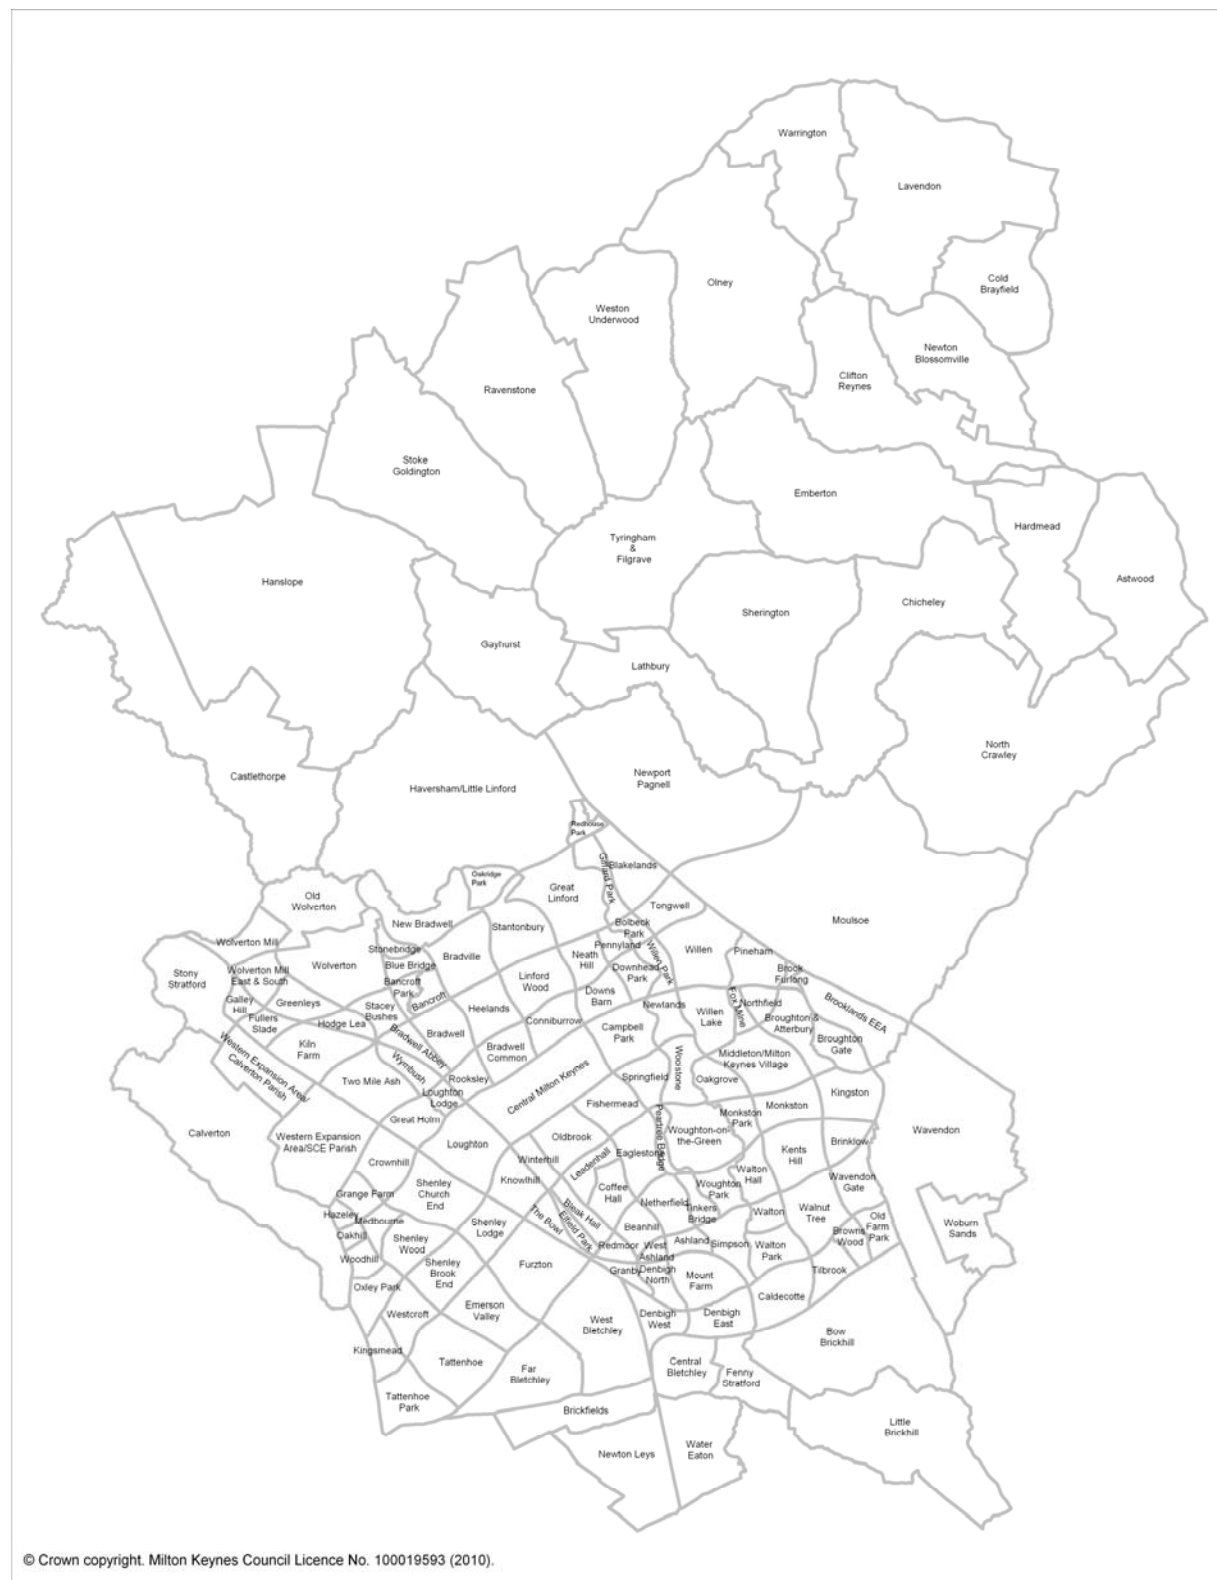

\*Derived from national data: smoking prevalence estimates were calculated based on General Household Survey 2006 national smoking rates by gender and socio-economic class. These were applied to 2001 census estate level estimates of the socio-economic structure of the population to get an estimate of the numbers of smokers by estate. This was then calculated as a proportion of the total estate population aged 16-74. The proportion of the population in different socio-economic groups is assumed not to have altered significantly since 2001.

## THE DATA AT ESTATE LEVEL

### Map 7: Estate and Settlement Boundaries

## DEFINITIONS AND METHODS

Describing the data used in the estate profiles and the source of the data.

### INCOME

#### **Housing/Council Tax Benefit May 2011**

Postcoded information on claimants was aggregated to estates/settlements and expressed per 1,000 dwellings. Estates and settlements are then ranked according to this figure. Milton Keynes average = 234.6 per 1,000 dwellings claim benefit.

### CHILDREN

#### **Family Referrals April 2010 - March 2011**

Counts of families referred to Social Services by estate expressed per 1,000 dwellings. Milton Keynes average = 22.9 per 1,000 dwellings.

Note: this data has been derived from a new system, so may not be directly comparable with pre 2008 data

#### **Funded Nursery Place Non-uptake 2011**

Count of 3 and 4 year olds not attending a funded nursery or play school in Milton Keynes. Milton Keynes average = 308.8 per 1,000 3 and 4 year olds.

Nursery school information comes from summer 2010 nurseries and the 2011 school census. This figure does not include children attending a full time school place or children not yet eligible for funding

#### **Children with Special Educational Needs (4 to 18 year olds) March 2011**

Postcoded data on children statemented with special educational needs is aggregated and expressed per 1,000 pupils. Estates and settlements are then ranked according to this figure. Milton Keynes average = 33.0 per 1,000 pupils.

#### **Free School Meals March 2011**

Postcoded information was aggregated to estates and settlements and expressed per 1,000 pupils. Estates and settlements are then ranked according to this figure. Milton Keynes average = 135.3 per 1,000 pupils.

#### **Educational attainment 2010**

The proportion of eligible pupils attaining BELOW Key Stage 2 level 4+ in English expressed per 1,000. Milton Keynes average: 197.2 per 1,000 pupils.

The proportion of eligible pupils gaining LESS THAN 5 GCSEs at grade A\*-C INCLUDING Mathematics and English expressed per 1,000. Milton Keynes average: 496.6 per 1,000 pupils.

### YOUNG ADULTS

#### **18-24 year olds Not Receiving Student Awards September 2009**

Postcoded information is aggregated and expressed per 1,000 18 to 24 year olds. Milton Keynes average = 891.0 per 1,000 18 to 24 year olds.

Note: these data are no longer available and so have not been updated.

## OLDER PEOPLE

### **Older People Clients of Neighbourhood Services April 2010 - March 2011**

Postcoded data on clients is aggregated and expressed per 1,000 pensioners. Estates and settlements are then ranked according to this figure. Milton Keynes average = 76.3 per 1,000 pensioners.

## COMMUNITY FACTORS

### **Domestic Fires Data April 2005 to March 2010**

Bucks Fire and Rescue Services postcoded data on domestic fires is aggregated to estates and settlements and expressed per 1,000 households. Milton Keynes average = 7.8 per 1,000 households over 5 years.

### **Violent Crime April 2010 - March 2011**

Recorded Violent crime at estate and settlement level is expressed per 1,000 total population. Milton Keynes average = 23.9 per 1,000 people.

### **Burglary (Dwellings) April 2010 - March 2011**

Recorded Burglary from dwellings at estate and settlement level is expressed per 1,000 dwellings. Milton Keynes average = 10.7 per 1,000 dwellings.

### **Criminal Damage April 2010 - March 2011**

Recorded Criminal Damage is expressed per 1,000 population at estate and settlement level. Milton Keynes average = 15.0 per 1,000 people.

### **Social Rented Housing March 2011**

MKC Council and Registered Social Landlord rented stock at estate and settlement is expressed per 1,000 dwellings. Milton Keynes average = 189.6 per 1,000 dwellings

### **Neighbour Complaints April 2010 - March 2011**

Milton Keynes Council Environmental Health postcoded data on domestic nuisance complaints is aggregated to estate and settlement and expressed per 1,000 dwellings. Milton Keynes average = 36.5 per 1,000 dwellings.

### **Adult Continuing Education April 2010 - March 2011**

Postcodes of clients enrolled in Adult Continuing Education courses were aggregated to estate and settlement level and expressed per 1,000 population not enrolled on ACE. Milton Keynes average = 979.7 per 1,000 people.

## HEALTH AND DISABILITY

### **Teenage Conceptions (Under 20 year olds) January 2009 - December 2010 annualised.**

Births and terminations data for teenage girls aged under 20 are aggregated to estate and settlement and expressed as an annual average per 1,000 15 to 19 year old girls. Estates and settlements are then ranked according to this figure. Milton Keynes average =

53.3 per 1,000 15 to 19 year old girls. Concerns over data volatility mean that extreme caution should be used in the use of this indicator.

#### **Disabled Concessionary Fares June 2011**

Postcoded data is aggregated to estate and settlement and expressed per 1,000 population. Milton Keynes average = 12.1 per 1,000 people.

#### **Disabled Clients of Neighbourhood Services April 2010 - March 2011**

Postcoded data from Neighbourhood Services on teams for Learning disability, Physical disability, Mental Health, Duty Team, Joint Elderly and Mental Health, and the Hospital is aggregated to estate and settlement and expressed per 1,000 population. Milton Keynes average = 5.8 per 1,000 people aged 18-64.

#### **Emergency Admissions April 2009 - March 2011**

The number of Emergency Admissions into hospital are expressed per year per 1,000 population. Milton Keynes average = 96.6 per 1,000 people.

#### **Non Emergency Admissions April 2009 - March 2011**

The number of Non Emergency Admissions into hospital are expressed per year per 1,000 population. Milton Keynes average = 111.0 per 1,000 people.

#### **A&E Attendances April 2009 - March 2011**

The number attendances at the accident and emergency (A&E) are expressed per year per 1,000 population. Milton Keynes average = 237.6 per 1,000 people.

Population Denominators - Population figures used in this publication are estimates from the 2010/11 Population Bulletin. Age specific populations are estimates based on postcoded figures from Buckinghamshire Health Authority Patient Registration data from the July 2011 patient register, these figures were then adjusted to match the 2010/11 Population Bulletin figures.

## ESTATE PROFILES

The information contained in this atlas is derived from the work done for Milton Keynes Council's Social Inclusion and Health Inequalities Programme. The profiles at estate and settlement level were prepared to highlight the extent of social exclusion in Milton Keynes and its concentration in particular areas, with a view to targeting areas to improve local services and community networks. The intention is to continue to develop using these indicators, so that the effects of any actions tackling the many aspects of social exclusion can be monitored.

The profiles also contain summary demographic information about the estate population, and key results from the 2001 census.
