## FOREWORD: GEOFF SNELSON, DIRECTOR OF STRATEGY

### Welcome to the 2012 edition of the Social Atlas

Milton Keynes is a dynamic and fast moving place that is fuelled by change and strong aspirations. The ability to create our own future and manage change allows us to pursue new strategies and respond to the needs of investors and changing economic and social circumstances faster than older, more established cities.

This agility provides Milton Keynes with a competitive advantage at a time when places are working increasingly hard to attract investment and jobs. But it requires high quality and regular data to help all concerned understand the fast changing nature of our communities. This is especially true for those providing services to the public who need to assess the impacts of policies and inform tough decisions about where to focus spending.

The Council believes that all those living in Milton Keynes should enjoy happy and fulfilled lives, and be safe from harm and neglect and achieve their full potential. The Social Atlas is a vital tool for all those working toward this aspiration as we seek to understand both opportunity and vulnerability and where we can most effectively act.

## EXECUTIVE SUMMARY

Milton Keynes as a whole is relatively affluent and most people enjoy a good quality of life but significant numbers of residents experience disadvantage in one or more categories.

### Income

- The rate of housing or council tax claimants grew to a high of 237.3 per 1,000 dwellings in 2010. Over the last two years the rate has decreased slightly to 233.4 per 1,000. However this is still higher than the 2009 rate of 222.4.
- The rate of housing or council tax claimants varies considerably within Milton Keynes. Beanhill has the highest rate with 592.3 per 1,000 dwellings. Although this is a slight decrease from last year (613.5).

### Education

- The rate of children claiming free schools meals has increased over the last 4 years from 116.1 per 1,000 pupils in 2009 to 145.1 in 2012. Tinkers Bridge has the higher rate of free school meals in Milton Keynes with a rate of 396.6.
- Educational attainment has increased both at Key Stage 2 and GCSE level over the last 4 years. The rate of pupils not attaining level 4 in key stage 2 English has reduced from 201.5 per 1,000 pupils in 2008 to 177.6 in 2011. There has been an even more marked decrease in those not obtaining 5 GCSEs at grade A\*-C including English and Maths. It has decreased from 578.9 per 1,000 pupils in 2008 to 481.7 in 2011.
- Educational attainment also varies within Milton Keynes with the lowest attainment seen in Beanhill, Eaglestone, Fenny Stratford and Netherfield.

### Community Factors

- Levels of Burglary, Criminal Damage and Violent Crime have all decreased considerably over the last year. Violent crime experienced the largest decrease; it fell from 23.9 crimes per 1,000 population to 17.5.
- The highest rates for both violent crime and criminal damage occurred in Central Milton Keynes because of the high visitor numbers.
- Central Milton Keynes also had the highest rate of neighbour complaints to environmental services with 162.3 complaints per 1,000 dwellings. The Milton Keynes average was 35.7.
- The rate of dwelling fires in Milton Keynes has been steadily declining. In 2002/8 there were 9.1 fires per 1,000 dwellings by 2006/11 this had declined to 7.5.

### Health and Disability

- Disabled concessionary fares and clients of disabled services are included as a pointer towards areas where the population have greater need of support. Estates

which have high levels in these indicators include Beanhill, Coffee Hall, Fenny Stratford, Pennyland and Willen Park.

- The rate of teenage conceptions has decreased from 53.3 per 1,000 15-19 year old girls in 2009-10 to 39.2 in 2010-11.
- The average life expectancy in Milton Keynes for 2007-2011 was 80.2 years, slightly higher than the previous year although this may be due to statistical fluctuations. The range between wards was almost 11 years. The ward with the highest life expectancy in this period is Middleton with a life expectancy at birth of 86.3 years. Woughton has the lowest life expectancy of 75.4 years, but this has risen since the previous calculations.

# INTRODUCTION

The purpose of this series of documents is to enable people working towards social inclusion to identify:

- the most significant social inclusion issues
- geographic concentrations of need
- the relative severity of social exclusion compared with other areas and the national picture
- a snapshot position
- geographic areas and issues where development of services and initiatives might be focused
- to measure change

It also serves to prompt discussion on possible causes of inequality and suggestions for actions to achieve improvement.

The data used are primarily locally collected data, intended to highlight areas with a high need for public services. Earlier work included developing a framework to structure information gathering, along the lines of those used by the government in “Opportunity for All” and by bodies such as the Joseph Rowntree Trust. The framework has the following categories:

- |                                |                         |
|--------------------------------|-------------------------|
| • Income                       | • Older people          |
| • Children                     | • Community factors     |
| • Young adults                 | • Health and disability |
| • Adults aged 25 to retirement |                         |

The indicators included this year are directly comparable with previous years. Data on the proportion of young people not going into higher education and the number of people with disabled concessionary fares could not be updated so previous years data have been used. Data on nursery place non-uptake has been removed.

The ideals restricting choices for indicators are that:

- They should be capable of being collected at ward and/or below ward level
- They should be commonly available across all local authorities
- They should ideally allow for national comparisons
- They should have an acknowledged relationship with disadvantage.

Useful developments since the first document have been:

1. The setting up of the Office for National Statistics website for the Neighbourhood Statistics Service. Extensive amounts of data, from the 2001 census and other administrative data sources, are available at local level at no cost. The site can be found at [www.neighbourhood.statistics.gov.uk](http://www.neighbourhood.statistics.gov.uk)
2. The development and updating of the Index of Multiple Deprivation, a multi-dimensional indicator available to lower-super output area level, published in 2000, 2004, 2007 and 2010.
3. The development of the MKi Observatory, a web-based data resource to share, map and visualise data. The web site can be found at: [www.mkiobservatory.org.uk](http://www.mkiobservatory.org.uk)

### Indicator trend key:

- ✓ data shows improving trend since the 2004 and 2011 Social Atlas
- ✗ data shows worsening trend since the 2004 and 2011 Social Atlas
- data broadly constant (within 10%) since the 2004 and 2011 Social Atlas
- ⊖ only baseline data available or insufficient data available to determine a trend

Note: this definition assumes higher uptake of services is worse, in reality the converse could be true in that more eligible persons are being identified. All comparisons are between rates so are unaffected by population growth.

\* Policy changes since the 2008 Social Atlas may have encouraged an increase in the number of Family Referrals.

# INDEX OF MULTIPLE DEPRIVATION 2010

## What is it?

The Index of Multiple Deprivation 2010 (IMD 2010) is a national measure of deprivation. It is used to analyse patterns of deprivation, identify areas that would benefit from special initiatives or programmes and as a tool to determine eligibility for specific funding streams.

It combines a number of indicators, chosen to cover a range of economic, social and housing issues, into a single deprivation score for each small area in England. This allows each area to be ranked relative to one another according to their level of deprivation. Most of the indicators used in the IMD 2010 are from 2008 although some of the indicators come from the 2001 Census. As with the 2007 indices, IMD 2010 has been produced at Lower Super Output Area level (LSOA), of which there are 139 LSOAs in Milton Keynes.

Map 2: IMD 2010 Overall Deprivation Rank

## Milton Keynes District

Map 2 shows the IMD 2010 mapped for the districts in England. The figures for Milton Keynes show that:

- Milton Keynes returned a score of 15.59 which is ranked 211<sup>th</sup> out of 326. With 1 being the most deprived. This compares to the 2007 rank of 212.
- Authorities ranked closely to Milton Keynes include Cheltenham (214); Chichester (213); Solihull (212); Braintree (210); East Devon (209).

## Milton Keynes' Lower Super Output Area Analysis

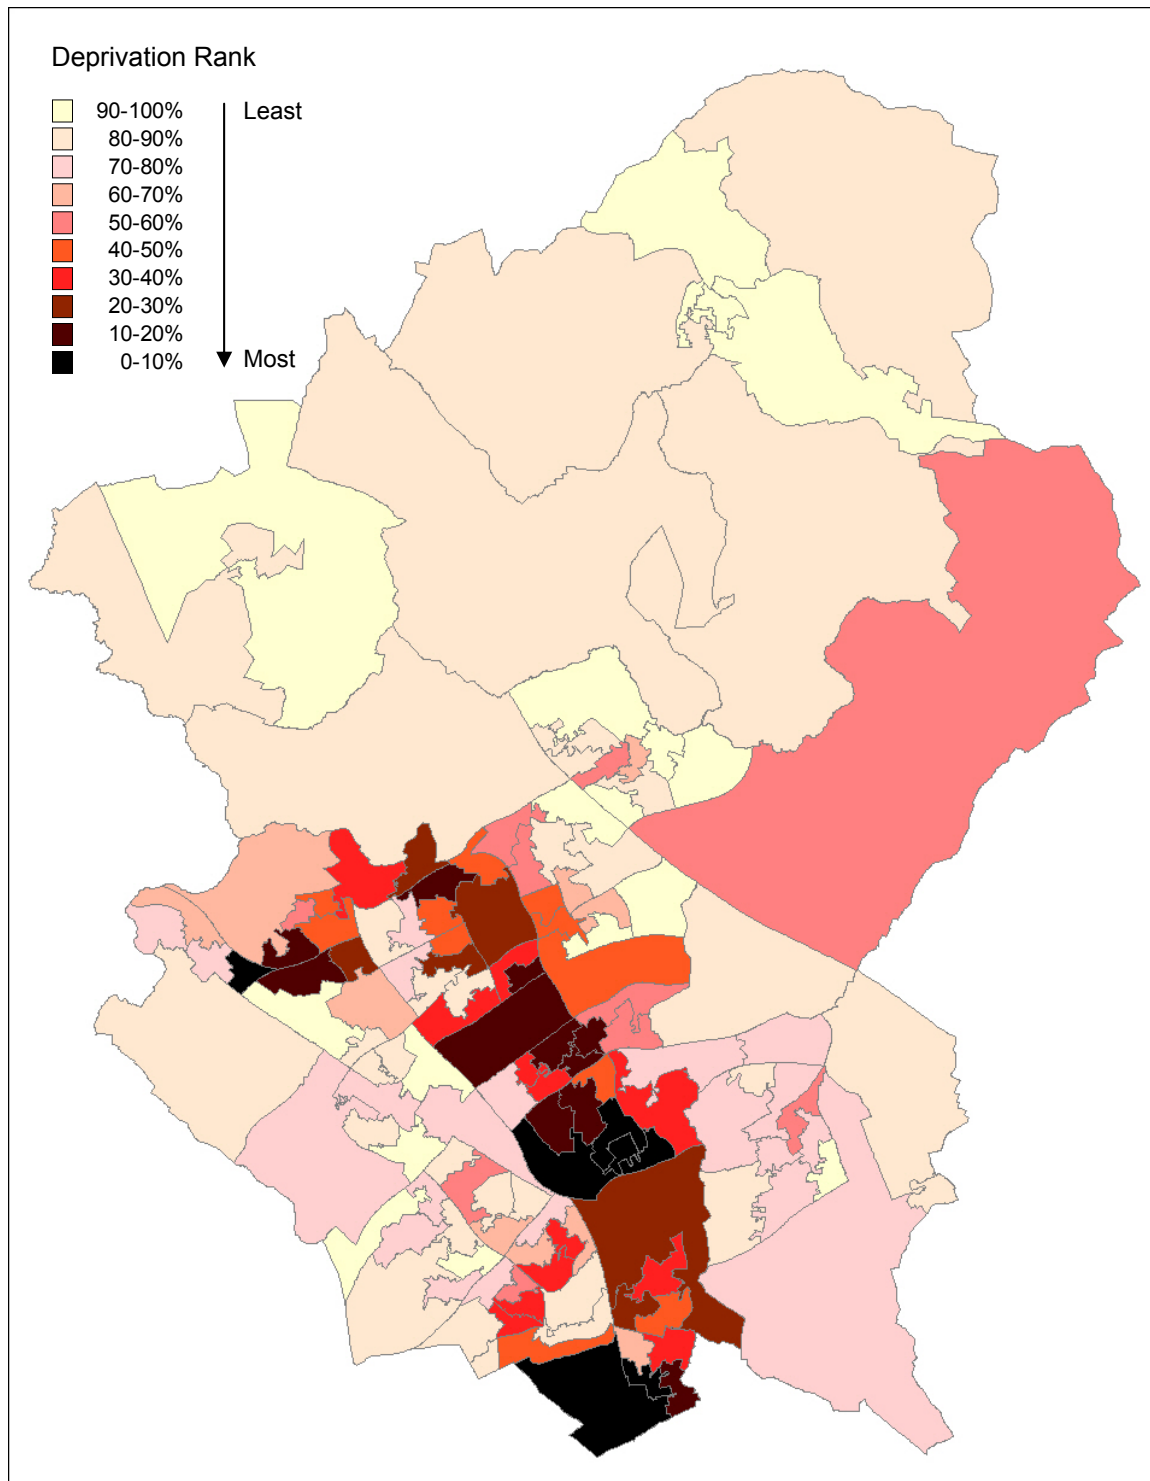

Table three shows the number of LSOAs in Milton Keynes within the most/least deprived 10%-30% LSOAs in England with a comparison to 2004 and 2007. The table shows that of the 139 LSOAs in Milton Keynes there are 7 which are within the 10% most deprived in England. This compares to 6 in 2007. Overall there are 24 LSOAs within the most deprived 30%, two more than the 2007 Index. There are 17 LSOAs within the least deprived 10% in England, three more than in 2007.

A significant number of Milton Keynes wards fall beneath the MK average (110.8 per 1,000 18-24 year olds). Woughton and Eaton Manor Wards have particularly low proportions. Olney, Sherington and Walton Park wards have the highest proportions.

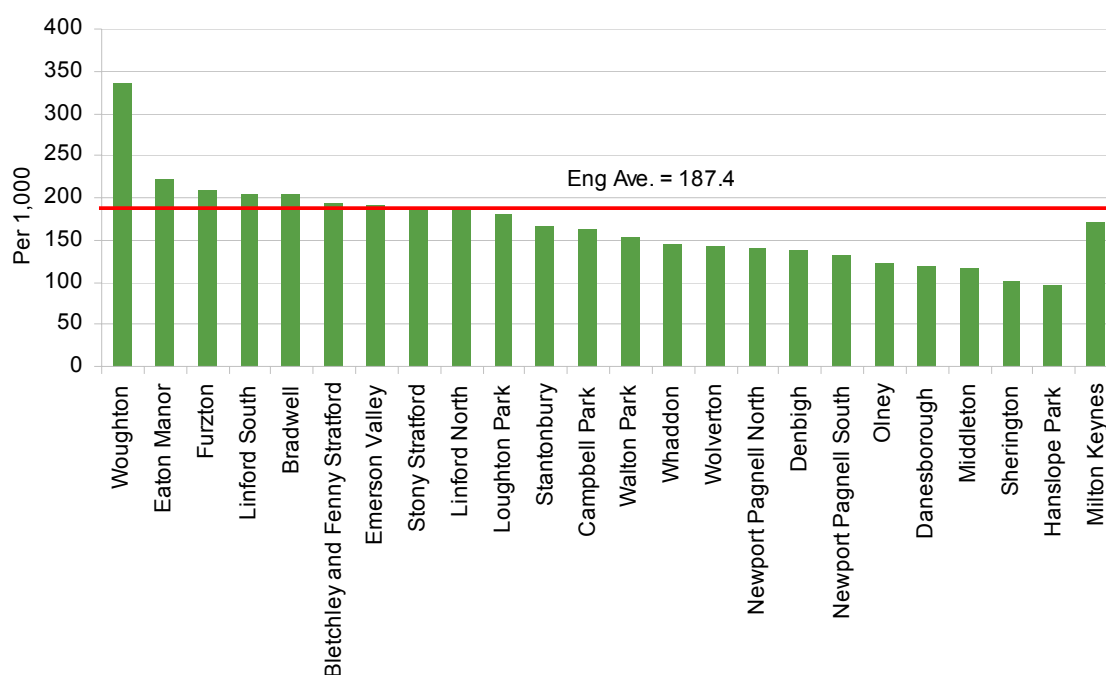

## OLDER PEOPLE

7,230 people aged 60 and over in Milton Keynes were claiming Pension Credit in August 2011. This is 171 per 1,000 population aged 60 and over, lower than the England average of 187.4 per 1,000. 9 out of 23 wards in Milton Keynes are above the national average with Woughton (335 per 1,000) standing out as significantly higher than the other wards. Eaton Manor, Furzton, Linford South, Bradwell, Bletchley and Fenny Stratford, Emerson Valley, Stony Stratford and Linford North Wards also have a higher than average number claiming Pension Credit.

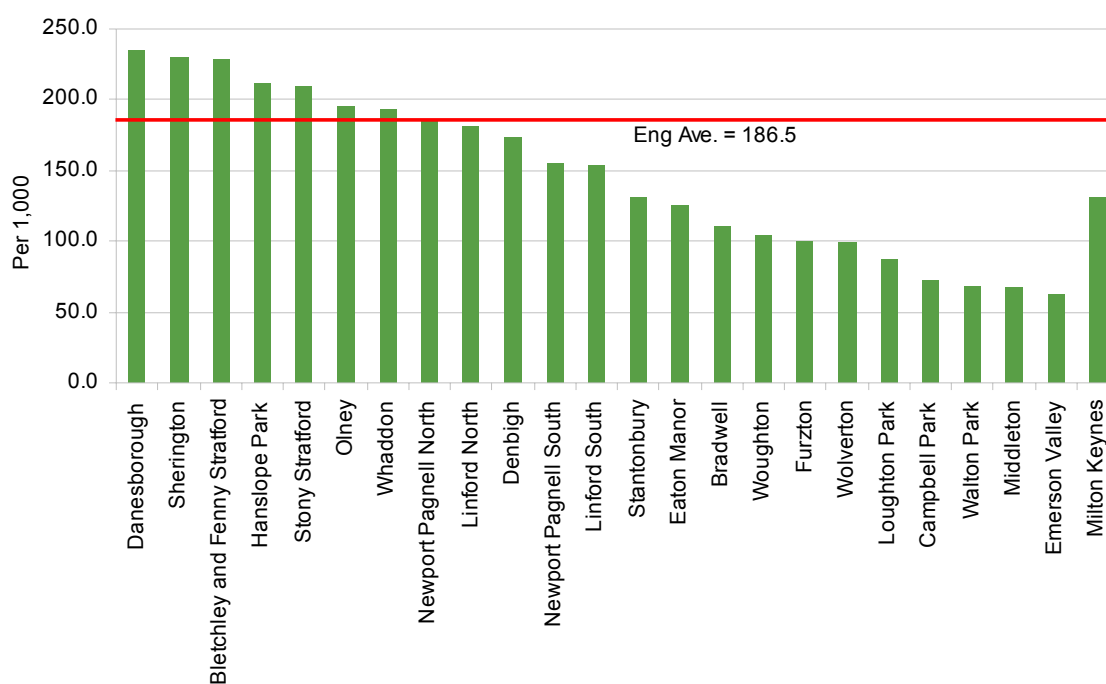

A total of 32,240 people in Milton Keynes claimed a State Pension in August 2011. This is 131.2 per 1,000 population, significantly lower than the England average of 186.5 per 1,000, reflecting the younger profile of Milton Keynes population.

**Figure 6: Pension Credit Claimants per 1,000 population aged 60+, August 2011**

The graph below shows there are significant variations in the proportion of people claiming a State Pension between the wards in Milton Keynes. Danesborough, Sherington and Bletchley and Fenny Stratford Wards are significantly above the England average. The wards with the lowest State Pension claimants are Emerson Valley (62.4 per 1,000), Middleton (67.0) and Walton Park (68.4).

**Figure 7: State Pension Claimants per 1,000 Population, August 2011**

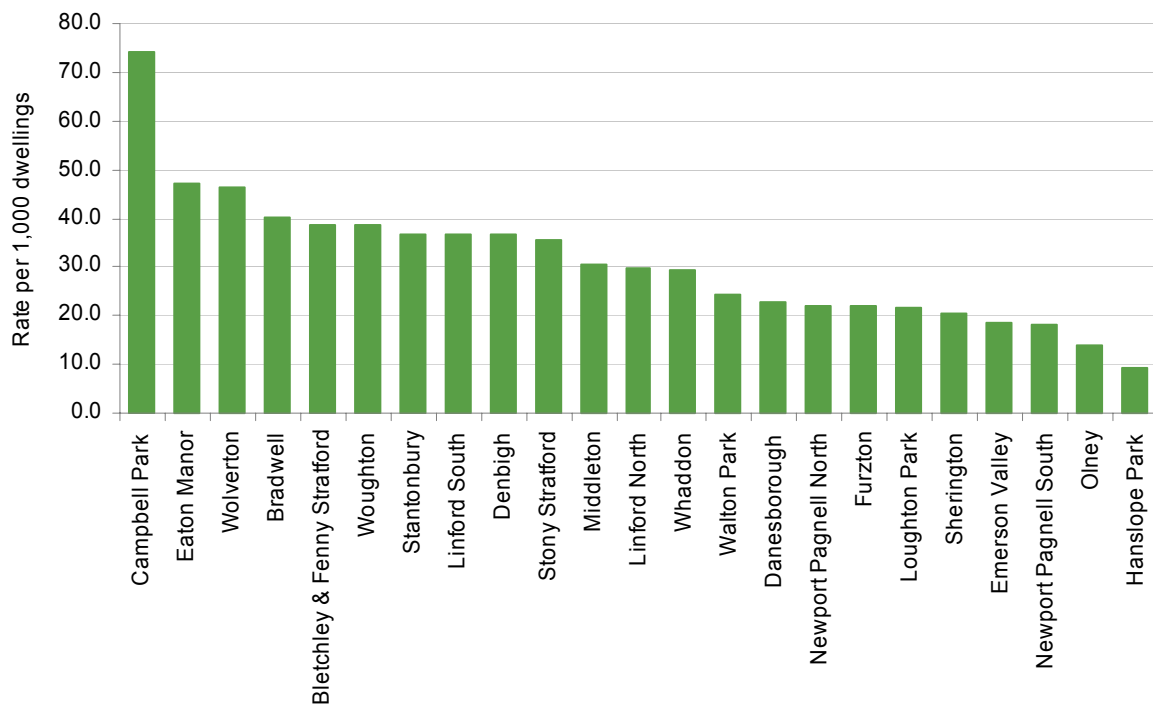

## NEIGHBOURHOOD COMPLAINTS AT WARD LEVEL

Neighbour complaints are an important tool for assessing the quality of life enjoyed in a neighbourhood. These are complaints by residents about their neighbours made to the Environmental Health service. Historically, the greatest numbers of complaints are about excessive and untimely noise. This year has seen complaints about various causes of noise including construction and street works. The rate of neighbour complaints per 1,000 dwellings has risen compared to the previous year.

The rural areas show generally lower complaints about neighbours, after accounting for the number of dwellings, than the urban areas. Hanslope ward has the lowest number of complaints per 1,000 dwellings this year, closely followed by nearby Olney. The lower level of complaints could be a result of the lower housing density in these areas. Campbell Park has the highest rate of neighbour complaints with 74.2 per 1,000 dwellings compared with 35.7 for Milton Keynes as a whole.

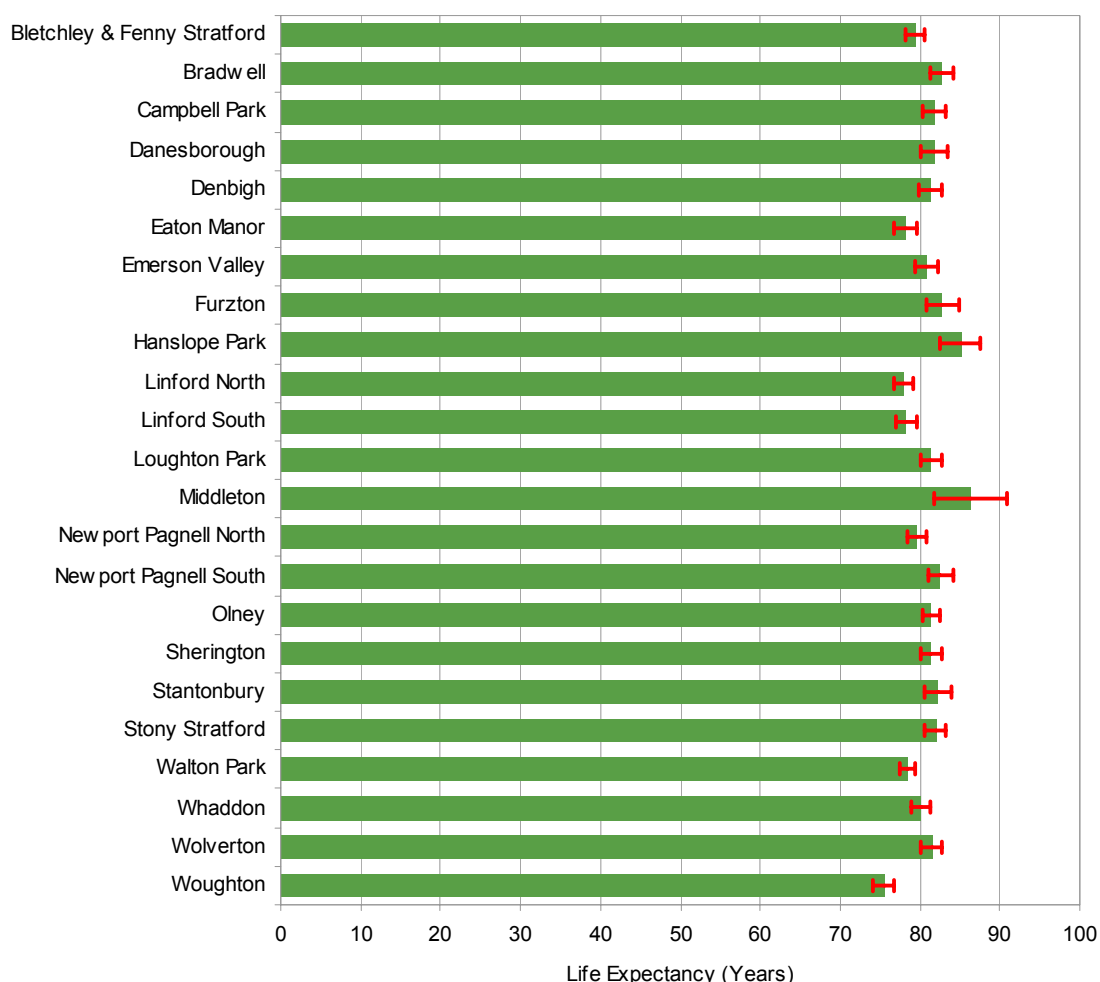

**Figure 8: Rate of Neighbour Complaints by Ward per 1,000 Dwellings 2011/12**

## HEALTH AND DISABILITY

People in the UK are healthier and living longer than ever before. The major advances in life expectancy over the last century are due mainly to declines in both infant mortality and mortality at older ages, public health innovations such as improvements in water quality and sewerage, and mass immunisation programmes which have reduced infectious diseases (DH, 2010). Life expectancy is linked to social circumstances, and the gap in life expectancies is large, and in some areas is widening. Life expectancy at birth does not reflect the life experience of any individual. Instead, it provides a summary of the mortality experience of the individuals living in a particular area, over a period of time. Gaps in life expectancy can be observed between local authority areas. For example, in 2008/2010 in the United Kingdom a difference of 13.5 years was observed between areas with the highest life expectancy at birth for boys, and areas with the lowest. The gap for girls in was 11.8 years. The gaps within these areas can be even wider. The current situation for Milton Keynes can be seen from figure 9.

**Figure 9: Persons Life Expectancy at Birth by Ward, 2007 to 2011 Average**

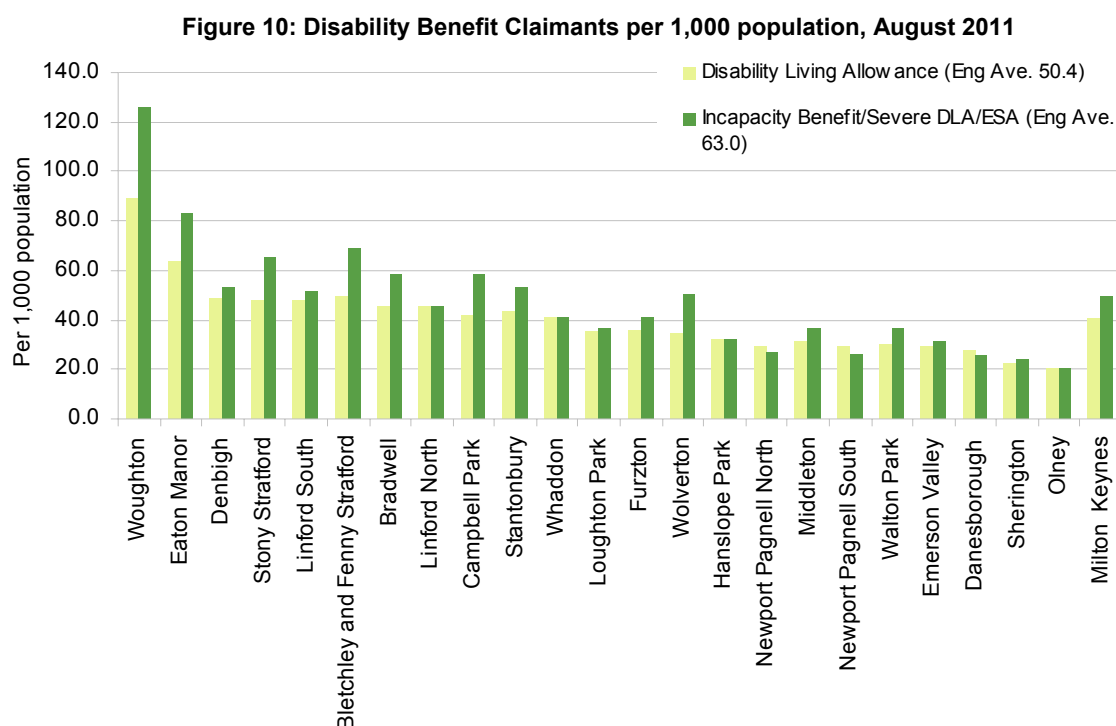

The average life expectancy in Milton Keynes for 2007-2011 was 80.2 years, slightly higher than the previous year although this may be due to statistical fluctuations. The range between wards was almost 11 years. The ward with the highest life expectancy in this period is Middleton with a life expectancy at birth of 86.3 years. Woughton has the lowest life expectancy of 75.4 years, but this has risen since the previous calculations.

The life expectancy at birth was 78.2 years for males, range 13 years. This is equivalent to the average male life expectancy for the UK, but slightly below that for England of 78.5 years. Middleton had the highest life expectancy for males of 85.5 years. Woughton has the lowest life expectancy for males of 72.6 years.

The life expectancy at birth for females in Milton Keynes has risen to 82.1 years, and the range has risen to 12.2 years. This is below the female life expectancy in England & Wales, 2008/2010 which was 82.5 years although these are not directly comparable because of the different time periods covered. Hanslope Park had the highest life expectancy of 90.4 years with Middleton second with 87.7 years. Woughton again had the lowest at 78.2 years, no change from the previous figure. There is a reasonably high level of consistency over time between the rankings of life expectancy (the relative position of wards) for the calculations. There is some variation due to statistical uncertainty surrounding such small-area calculations which is to be expected.

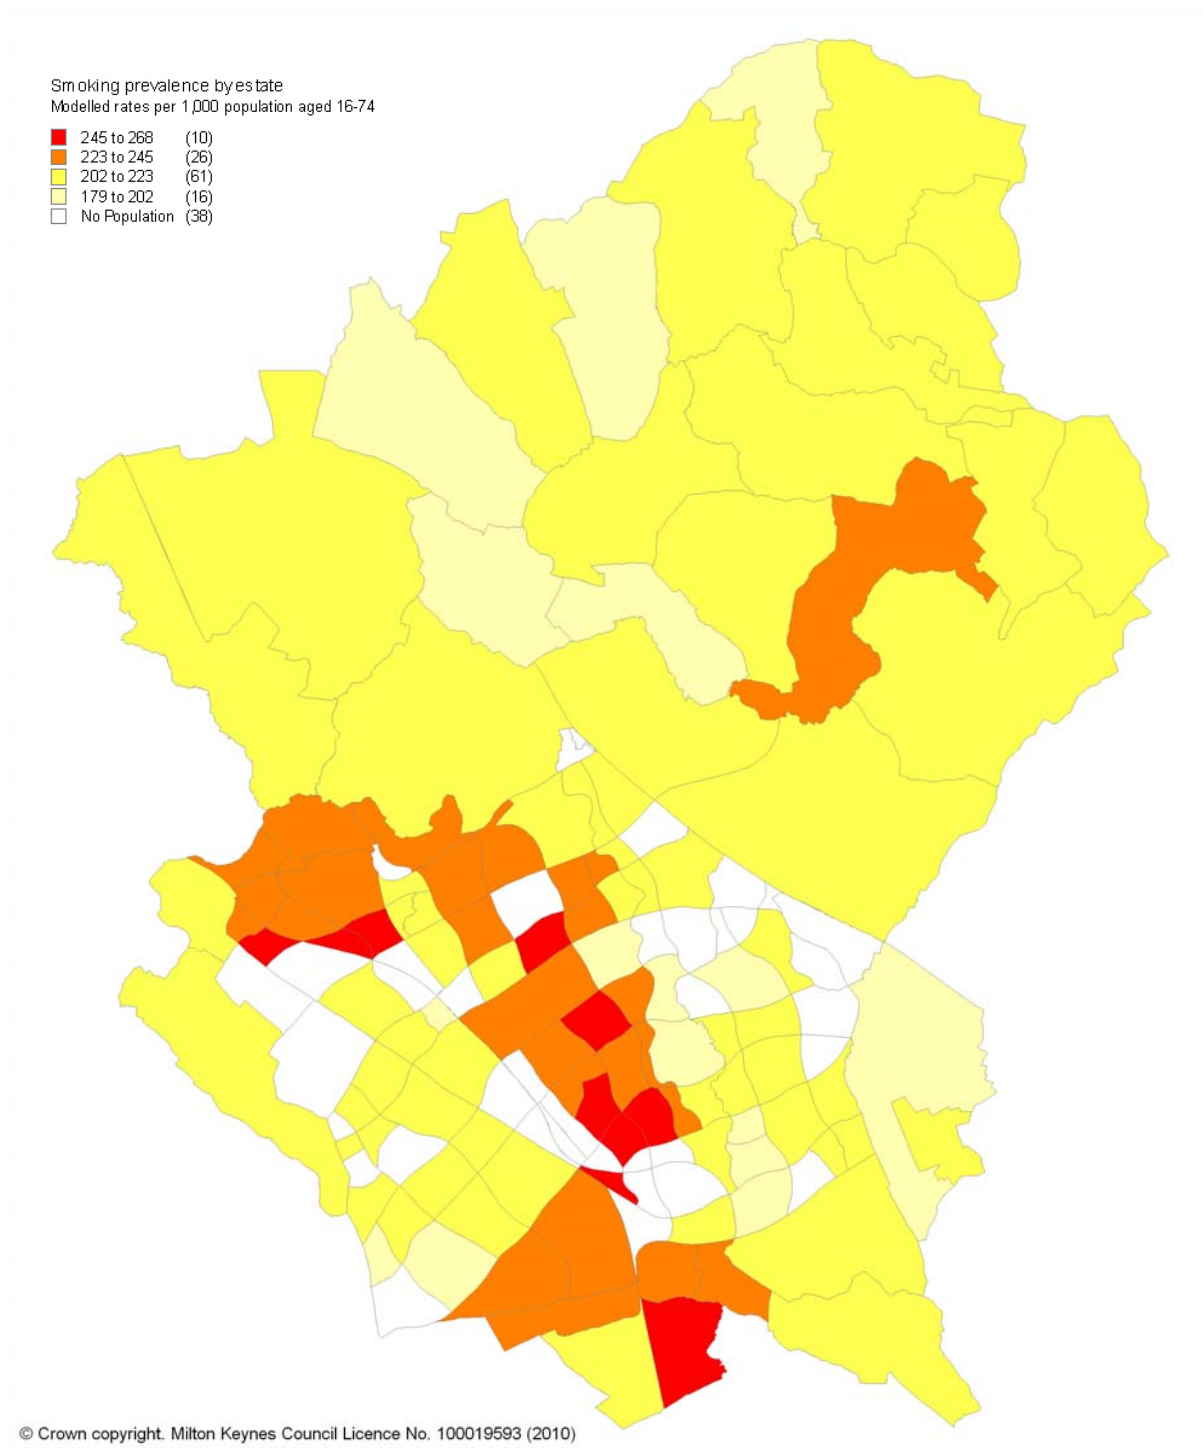

Nationally available disability benefits data provide us with results at ward level. Milton Keynes has a lower proportion of residents claiming Incapacity Benefit/Severe Disability Living Allowance/Employment Support Allowance and Disability Living Allowance than for England as a whole. Woughton ward is significantly higher than the national average for both disability benefits. Eaton Manor Ward also has higher than the national average in both benefits.

Indicators such as Disabled Concessionary Fares and Clients of Disabled Services at Milton Keynes Council are useful at looking at local health and disability. They have been useful in pointing out several areas of need, such as Beanhill, Coffee Hall, Fenny Stratford, Pennyland, and Willen Park. These can be seen in the estate indicators section.

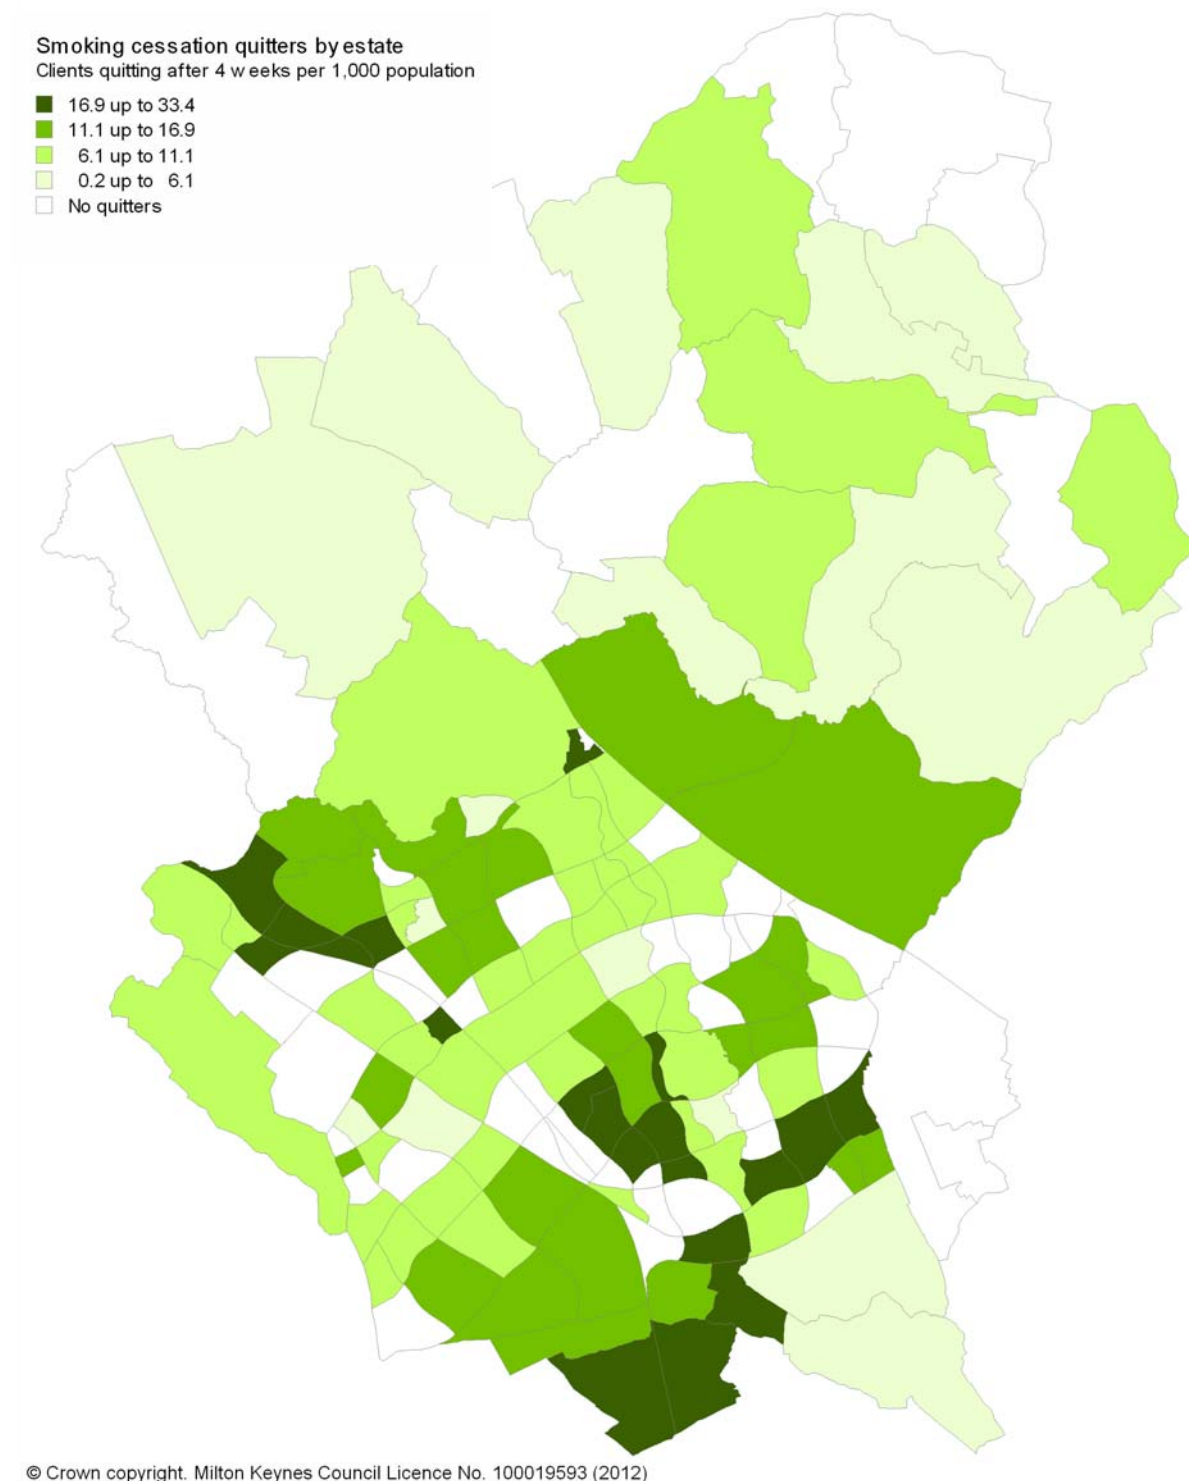

**Map 5: Smoking Prevalence estimates by Estate per 1,000 population aged 16-74\***

\*Derived from national data: smoking prevalence estimates were calculated based on General Household Survey 2006 national smoking rates by gender and socio-economic class. These were applied to 2001 Census estate level estimates of the socio-economic structure of the population to get an estimate of the numbers of smokers by estate. This was then calculated as a proportion of the total estate population aged 16-74. The proportion of the population in different socio-economic groups is assumed not to have altered significantly since 2001.

# ESTATE PROFILES

The information contained in this atlas is derived from the work done for Milton Keynes Council's Social Inclusion and Health Inequalities Programme. The profiles at estate and settlement level were prepared to highlight the extent of social exclusion in Milton Keynes and its concentration in particular areas, with a view to targeting areas to improve local services and community networks. The intention is to continue to develop using these indicators, so that the effects of any actions tackling the many aspects of social exclusion can be monitored.

The profiles also contain summary demographic information about the estate population, and key results from the 2001 census.

How the value  
compares with  
the MK  
average

If less than  
100 it is less  
than average  
so it's a 'good'  
thing.

If more than  
100 it is more  
than average.

e.g. 265.1  
means more  
than twice the  
average.
