

Disabled Clients of Social Services Over Time

This report analyses disabled clients of social services data provided for the production of the Social Atlas between 2006 and 2012.

Borough level data over time

Looking at the rate per 1,000 16-64 year old population (to adjust for the growth in numbers because of the population growth) the trend between 2006/7 and 2009/10 was relatively static. In 2009/10 it was 8.9 per 1,000 compared to 9.3 in 2006/7. The figures for 2010/11 and 2011/12 are not comparable to the previous figures as they do not include OT equipment.

Estate and Settlement level over time

The pattern of disabled services clients is not uniform across the borough. Some estates have significantly above average proportions of clients. Maps 1 and 2 show the rates per 1,000 dwellings for estates in 2006/7 and 2011/12.

Table 1 shows the top ten estates between 2006/7 and 2011/12. It outlines that Beanhill was ranked highest between 2006/7 and 2010/11 and second highest in 2011/12. Willen Park was ranked first in 2011/12 and second in the previous four years this may be because it contains a retirement village which was built in 2007. Coffee Hall also ranks highly in all six years.
