

# Milton Keynes

updated 28 July 2010

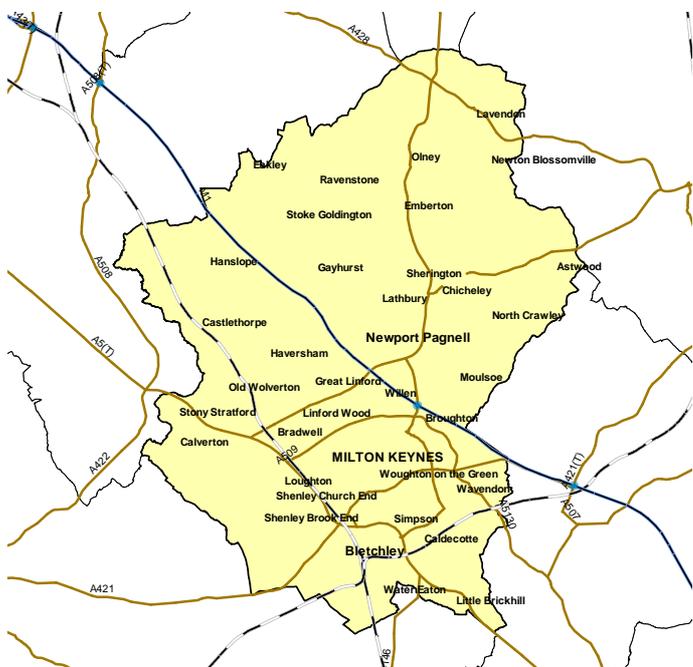

This profile gives a picture of health in this area. It is designed to help local government and health services improve people's health and reduce health inequalities.

Health Profiles are produced every year by the Association of Public Health Observatories.

Visit the Health Profiles website to:

- see profiles for other areas

## Milton Keynes at a glance

- The health of people in Milton Keynes is similar to the England average. Levels of deprivation are low but the violent crime rate is high with 6,000 incidents a year.
- There are health inequalities within Milton Keynes. Life expectancy for men living in the most deprived areas is nearly 7 years lower than for men living in the least deprived areas. For women the gap is nearly 4 years.
- Over the last 10 years the rate of death from all causes, and rates of early death from cancer and from heart disease and stroke, have fallen and remain similar to the England averages.
- The proportion of children living in poverty is lower than the England average. GCSE achievement and the proportion of children spending at least 3 hours a week doing school sport are lower than average. 1 in 10 children in Reception year are classified as obese.
- It is estimated that 1 in 4 adults are obese, just over 1 in 4 eat healthily and only 1 in 10 are physically active. More than 1 in 5 adults smoke and there are over 260 smoking related deaths each year. There were over 3,200 hospital stays for alcohol related harm in 2008/09.
- The hip fracture rate for those aged over 65 is amongst the highest in the country.
- The Milton Keynes Local Area Agreement has prioritized tackling drug misuse, teenage pregnancy, stopping smoking, and health inequalities.
- For further information see the Director of Public Health's annual report at [www.miltonkeynes.nhs.uk](http://www.miltonkeynes.nhs.uk)

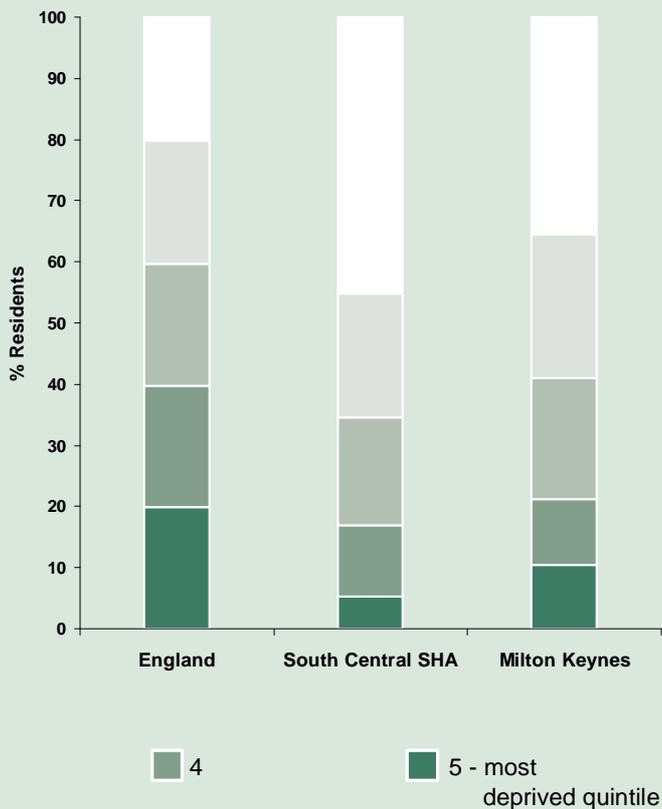

## Deprivation: a national view

This map shows differences in deprivation levels in this area based on national quintiles (of the Index of Multiple Deprivation 2007 by Lower Super Output Area). The darkest coloured areas are some of the most deprived areas in England.

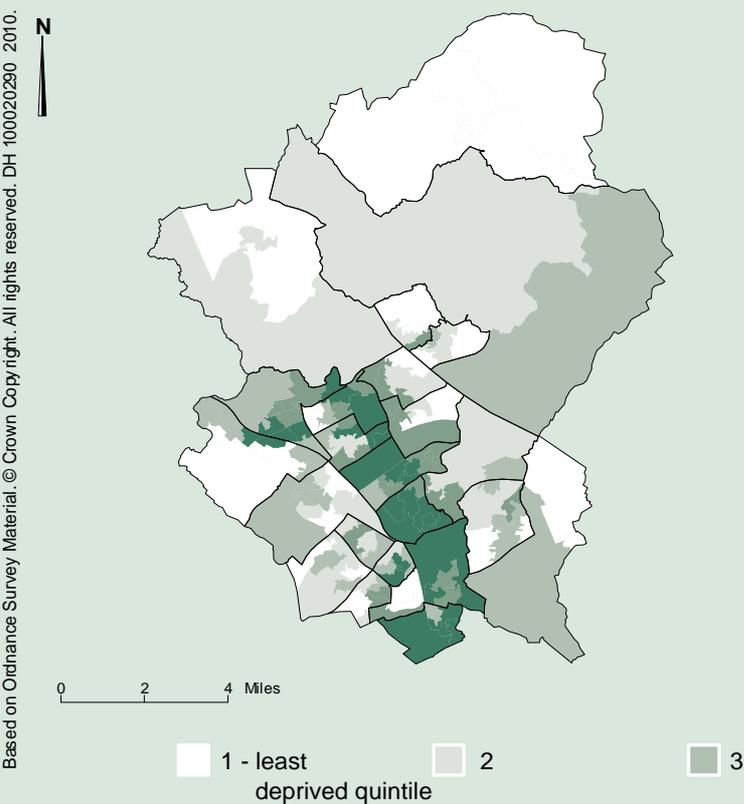

This chart shows the percentage of the population in England, this region, and this area who live in each of these quintiles.

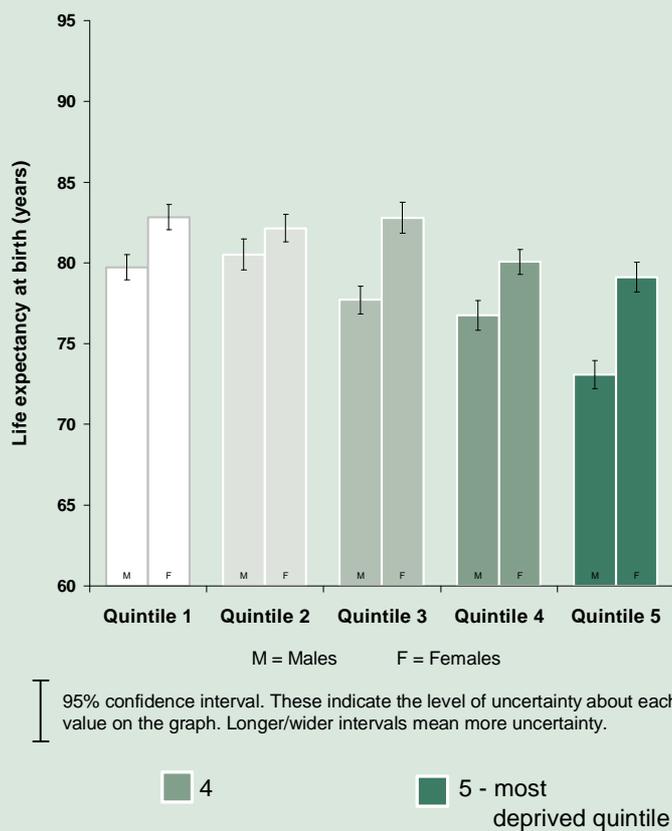

## Health inequalities: a local view

This map shows differences in deprivation levels in this area based on local quintiles (of the Index of Multiple Deprivation 2007 by Lower Super Output Area). The darkest coloured areas are the most deprived in this area.

This chart shows the life expectancy at birth for males and females (2004-2008) for each of the quintiles in this area.

## Health inequalities: changes over time

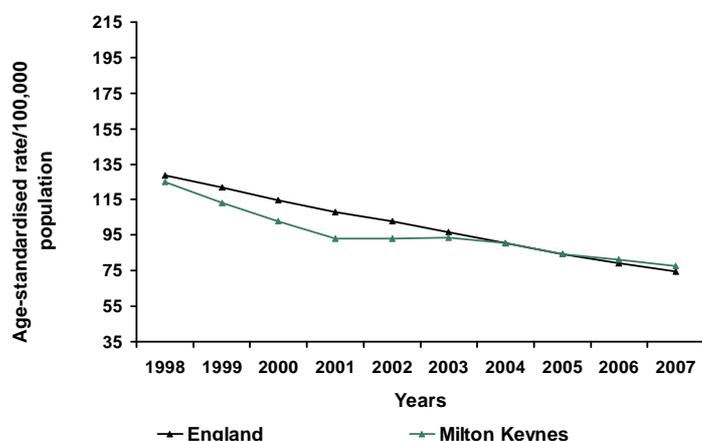

These graphs show how changes in death rates for this area compare with changes for the whole of England. Data points on the graph are mid-points of 3-year averages of yearly rates. For example the dot labelled 2003 represents the 3-year period 2002 to 2004.

Trend 1 compares rates of death, at all ages and from all causes, in this area with those for England.

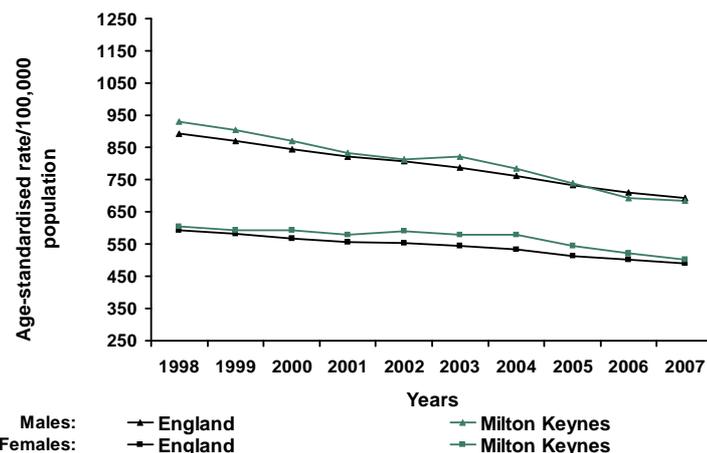

Trend 2 compares rates of early death from heart disease and stroke (in people under 75) in this area with those for England.

Trend 3 compares rates of early death from cancer (in people under 75) in this area with those for England.

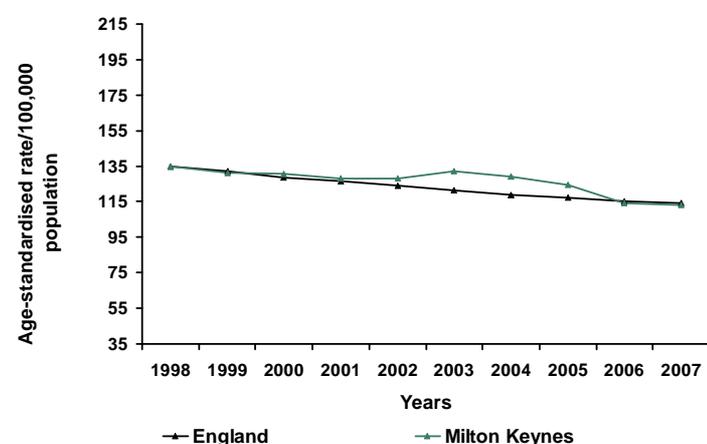

### Trend 2: Early death rates from heart disease and stroke

### Trend 1: All age, all cause mortality

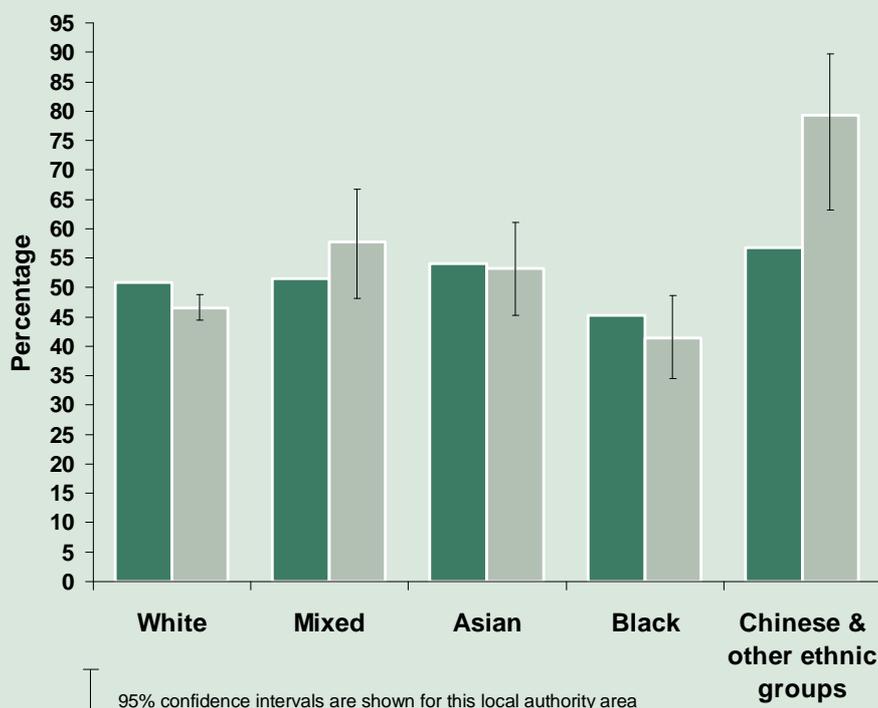

### Trend 3: Early death rates from cancer

## Health inequalities: ethnicity

This chart shows the percentage of pupils by ethnic group in this area who achieved five GCSEs in 2008/09 (A\* to C grades including English and Maths). Comparing results may help find possible inequalities between ethnic groups.

Legend:  
■ England  
■ Milton Keynes

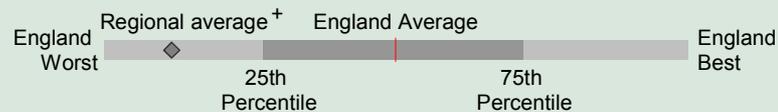

Ethnic Groups	% pupils achieved grades	No. of pupils achieved grades
White	46.6	959
Mixed	57.7	60
Asian	53.3	80
Black	41.4	75
Chinese/other	79.4	27

If there are any empty cells in the table this is because data has not been presented where the calculation involved pupil numbers of 0, 1 or 2. Some further groups may not have data presented in order to prevent counts of small numbers being calculated from values for other ethnic groups or areas.

# Health summary for Milton Keynes

The chart below shows how the health of people in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average rate for England is shown by the red line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

- Significantly worse than England average
- Not significantly different from England average
- Significantly better than England average
- No significance can be calculated

<sup>+</sup> In the South East Region this represents the Strategic Health Authority average

Domain	Indicator	Local No. Per Year	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
