

## Family Referrals Over Time

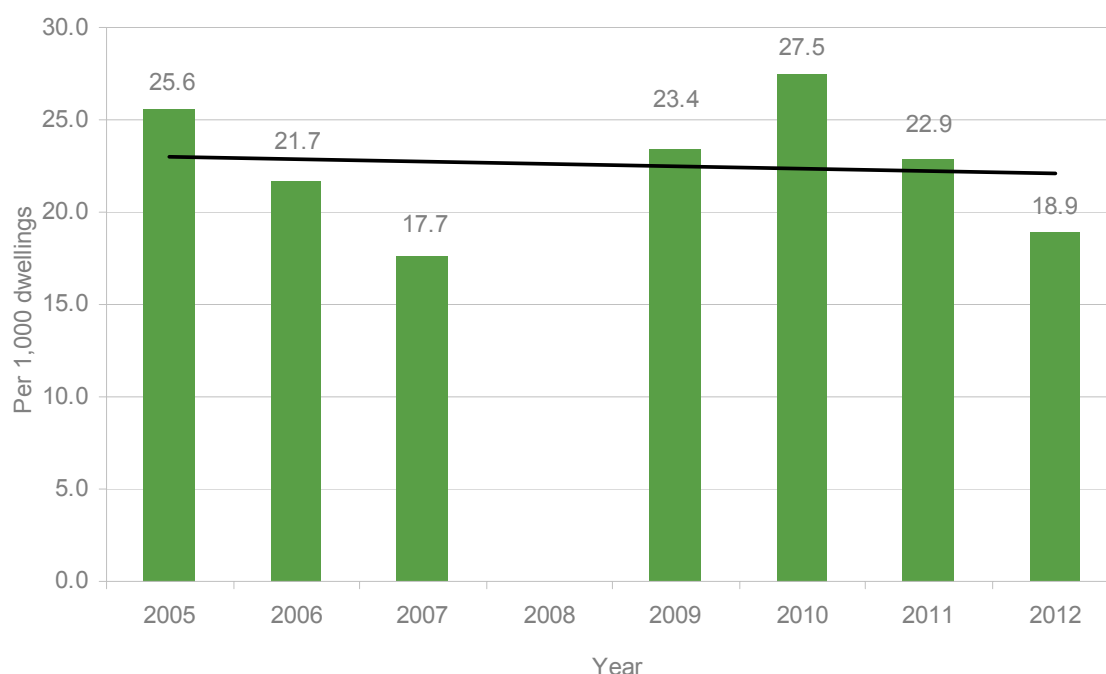

This report analyses family referrals data provided for the production of the Social Atlas between 2005 and 2012. There is no data for 2008.

### Borough level data over time

There were 1,965 family referrals in 2012 a decrease from 2,332 in 2005.

Looking at the rate per 1,000 dwellings (to adjust for the growth in numbers because of the population growth) the trend between 2005 and 2011 is uncertain. Between 2005 and 2007 there was a gradual decrease in rate of family referrals. Between 2009 and 2011 the rate went back up to roughly the same rate as in 2005. There was then a decrease in 2012.

### Estate and Settlement level over time

The pattern of family referrals is not uniform across the borough. Some estates have significantly above average proportions of referrals. Maps 1 and 2 show the rates per 1,000 dwellings for estates in 2005 and 2011.
