

Introduction

This document provides a set of thematic maps on the **accommodation type** of estates and settlements in Milton Keynes from 2011 Census data.

You can download the tables of data used in the maps via the MKi Observatory using the link below:

Methodology

These maps were created by the Research and Intelligence team at Milton Keynes Council based on 2011 Census data published by the Office for National Statistics.

The 2011 Census data was not released at estate level. The Research and Intelligence team at Milton Keynes Council therefore added together Output Area (the smallest census geography) data to provide an estimate at estate level. As Output Areas (OAs) boundaries and estate boundaries do not always match, the data for OAs is weighted to estates. The data in the maps should therefore be seen as estimates based on 2011 Census data rather than actual figures. Full information on the methodology used to estimate the data at estate level can be viewed here:
